ACKNOWLEDGMENTS

These financial education learning sessions, collectively titled *Dream Big! Shillings for Our Future*, were developed as part of the Adolescent Girls Initiative – Kenya, funded by a grant from the UK Department for International Development. The overall goal of the program is to help young, vulnerable adolescent girls in two of Kenya’s most marginalized areas – urban slums and Northeastern Kenya, build their social, health and economic assets. Specifically, in order to build girls’ economic assets, they participate in training sessions on financial education, as well as have the opportunity to open savings accounts (in urban areas) or save informally (in Northeastern Kenya). The project is led by the Population Council, in partnership with Save the Children – Kenya, Plan International, the African Population and Health Research Center (APHRC) and Itad.

Many people were involved in the design, testing and finalization of the learning sessions. The initial sessions that serve as the core source of the sessions in this book, *Young Women: Your Future Your Money*, were developed by Candace Nelson, Jessica Massie, and Bailey Butzberger of Microfinance Opportunities and Karen Austrian of Population Council for a girls program in Kenya and Uganda, funded by the Nike Foundation and the Financial Education Fund. An adaptation to the Zambian context was done by Nambula Kachumi, Karen Austrian, Natalie Jackson Hachonda, Diana Bulanda and Bwalya Mushiki of Population Council; Rathi Mani and David James-Wilson of Making Cents International; and David Mukwavi, Mebelo Mebelo, Godfrey Musukwa, and Esther Syapaka of NatSave. This adaptation to the Northeast Kenyan context was led by Joyce Kimani at Save the Children Kenya, and reviewed by MASDEV Consultancy Firm, Ltd, and Diana Moreka, Karen Austrian and Eunice Muthengi at Population Council. We also thank the AGI-K Wajir External Advisory Committee for their input in the draft curriculum to ensure contextual appropriateness.

PROJECT PARTNERS

The Population Council, Kenya

The Population Council confronts critical health and development issues—from stopping the spread of HIV to improving reproductive health and ensuring that young people lead full and productive lives. Through biomedical, social science, and public health research in 50 countries, we work with our partners to deliver solutions that lead to more effective policies, programs, and technologies that improve lives around

the world. Established in 1952 and headquartered in New York, the Council is a non-governmental, nonprofit organization governed by an international board of trustees. The Council’s Nairobi office was established in 1998 and has worked to improve the health and well-being of Kenya’s poorest and most vulnerable people.

Save the Children – Kenya

Save the Children International is the leading independent organization creating lasting change in the lives of millions of children in need around the world. Recognized for its commitment to accountability, innovation and collaboration, its work takes them into the heart of communities, where they help children and families help themselves. They work with other organizations, governments, non-profits and a variety of local partners while maintaining their own independence without political agenda or religious orientation. Their Vision is a world in which every child attains the right to survival, protection, development and participation. Their Mission is to inspire breakthroughs in the way the world treats children, and to achieve immediate and lasting change in their lives.

Save the Children has supported children in Kenya since before its independence in 1963 and has had a consistent operational presence in the country since 1984. Save the Children provides support to children through developmental and humanitarian relief programmes delivered both directly and through local partners. Current programming focuses on child protection, child rights governance, education, Health, HIV/AIDS, livelihoods, nutrition and WASH.

UK Department for International Development

The Department for International Development leads the UK government’s effort to fight global poverty, delivering UK aid around the world. DFID is led by a UK cabinet minister and operates under the International Development Act, which came into force in 2002. DFID’s overall aim is to reduce poverty in poorer countries, in particular through achieving the Millennium Development Goals. Key issues that DFID is focusing on in over 30 countries are education, health, economic growth and the private sector, governance and conflict, climate and environment, water and sanitation, food and nutrition, and humanitarian disasters and emergencies. As part of its work, DFID is committed to the achievement of gender equality and the empowerment of women and girls.

INTRODUCTION

FINANCIAL EDUCATION FOR ADOLESCENT GIRLS

Adolescent girls like us are on the edge; we stand at the gateway to adulthood and a future full of responsibilities about which we are not always so fully aware. We often find ourselves teetering between dependence on childhood caretakers and the independence we crave as young adults. We are experimenting with new social relationships and we are assuming more financial responsibilities. This tumultuous period is also the critical time for young people like us to face our futures and begin preparing for the economic roles we will assume as adults. Teaching ourselves how to manage our money and build assets can help us protect ourselves and expand our opportunities. This is the role of financial education and this is the reason for the *Dream Big! Shillings for Our Future* curriculum.

WHY IS FINANCIAL EDUCATION IMPORTANT FOR ADOLESCENT GIRLS?

At a basic level, financial education focuses on concepts of money and ways to manage it well. It promotes regular saving, wise spending and ways to make the most of our resources. These skills serve as a foundation for girls like us, who are transitioning from dependent to independent roles in our financial responsibilities. We are shifting from depending on our families for support to earning our own money and making independent financial decisions. At a very basic level, we must know how to handle ourselves, pursue income opportunities, pay for our expenses, and plan for the future. However, we also know that in a few years' time, we will become young women, have more responsibilities for marriage, households, children, as well as additional responsibilities related to employment, shelter, and relationships.

Therefore, we know that financial education will help us know how to manage our day-to-day expenses, but also in the future. Good money management can minimize some of the risks we face in our lives, and build financial support for the future.

These are skills that we adolescent girls need now and will need every day of our adult lives. An investment in financial literacy for adolescent girls sets the stage for the many changes that are coming. It will increase our ability to manage money, as well as confidence and readiness for the future. Financial knowledge can open up new opportunities to work, build assets, and save. Access to and control over savings can help to protect us against, mitigate, and cope with many risks associated with adolescence—by providing resources to draw upon in times of need.

HOW TO USE THIS GUIDE

Dream Big! Shillings for Our Future is a collection of learning sessions designed to prepare adolescent girls for the financial responsibilities of adulthood, providing them with the knowledge and skills to transition from economic dependence to independence. These sessions were developed to be delivered without a lot of resources or materials, with limited time available for training. The guide contains step-by-step descriptions of the learning activities as well as background information to orient you, the trainer, to the topic.

CURRICULUM STRUCTURE

Adolescent Girls Initiative–Kenya

These learning sessions were developed as part of the Adolescent Girls Initiative–Kenya (AGI-K). The overall goal of AGI-K is to test multi-sectoral packages of interventions for younger adolescent girls to determine which package delivers the most impact and at what cost. The wealth creation intervention being tested is financial education, together with savings opportunities, delivered in a safe and fun learning environment. During weekly group meetings, girls will be trained on financial education through this curriculum, in addition to health and life skills topics (the health intervention).

The complete **FINANCIAL EDUCATION** (FE) curriculum is included here. However, the girls groups will meet over the course of two years and it is anticipated that the financial education sessions will be integrated with the health and life skills (HLS) curriculum. The proposed full session order is as follows:

HLS Introductory Sessions

- Session 1: What to Expect – Part 1
- Session 2: What to Expect – Part 2
- Session 3: His and Hers (Gender Roles)
- Session 4: Goal Identification – The Road of Life
- Session 5: Goal Setting and Achieving
- Session 6: My Relationships

FE FINANCIAL EDUCATION

- Session 1: Dream Big!
- Session 2: Why Save?
- Session 3: Choose a Savings Goal
- Session 4: Make a Savings Plan
- Session 5: Save in a Safe Place
- Session 6: Learning about Home Banks

HLS Water, Sanitation, and Hygiene

- Session 1: Hand Washing and Water Storage
- Session 2: Hygiene with Latrines and Food
- Session 3: Menstrual Hygiene

Odd to address Menstrual Hygiene
before addressing Menstruation?

HLS Nutrition

- Session 1: Nutrition Needs for Adolescent Girls
- Session 2: Anaemia in Adolescent Girls

FE FINANCIAL EDUCATION

- Session 7: Exploring Options for Earning Money
- Session 8: Girls' Money and the Risky Income Cycle

HLS Life Skills

- Session 1: Self-Esteem
- Session 2: Passive, Assertive, Aggressive
- Session 3: Reasons to Delay Marriage
- Session 4: Drugs and Other Mind-Altering Substances

FE FINANCIAL EDUCATION

- Session 9: Know the Difference Between Needs and Wants
- Session 10: Control Spending
- Session 11: Think About the Future: Money In and Money Out
- Session 12: Save Regularly!
- Session 13: Dealing with Setbacks in Saving

HLS Life Skills

- Session 5: Peer Pressure
- Session 6: Making Good Decisions
- Session 7: How to Communicate with Adults
- Session 8: Managing Stress and Anger
- Session 9: Conflict Resolution and Problem Solving Skills

HLS HIV and AIDS

- Session 1: HIV and AIDS
- Session 2: Myth or Fact?

HLS Reproductive Health

- Session 1: My Body Is Changing – Am I Normal?
- Session 2: How Menstruation Happens
- Session 3: Abstinence
- Session 4: Child Spacing Methods for Women and Girls
- Session 5: Reproductive Myths

FE FINANCIAL EDUCATION

- Session 14: Your Own Money vs. Someone Else's Money
- Session 15: Talking About Money
- Session 16: The DOs and DON'Ts of Talking About Money
- Session 17: Resolving Conflicts About Money
- Session 18: Role Play Resolving Conflicts
- Session 19: Our Journey to Good Money Management

HLS Gender-Based Violence

- Session 1: Gender-Based Violence
- Session 2: How to Report and Avoid Cases of Sexual Violence
- Session 3: Safety Planning
- Session 4: Preventing Unwanted Advances

HLS Harmful Traditional Practices

- Session 1: Early and Forced Marriages
- Session 2: Female Genital Mutilation/Cutting (FGM/C)

HLS Human Rights

- Session 1: Human Rights and Children's Rights

HLS Leadership

- Session 1: Leadership
- Session 2: Community Service: Putting Leadership into Action

BE PREPARED IN ADVANCE!

Because the learning sessions are spelled out in detail, you do not have to create anything from scratch. However, you must review the sessions and prepare any necessary materials before the training begins. The success of the learning sessions depends on your work at this stage.

Some of the sessions contain special features. These features are explained in detail in the learning session where they are found, and an overview is provided below:

- **SWOT Exercise:** Session 1 requires you to teach SWOT Analysis to girls. SWOT is a simple way to evaluate Strengths, Weaknesses, Opportunities, and Threats (SWOT) for any given topic. Review the session and Content Note before teaching it to girls, so that you understand the concept well in advance.
- **Stories:** Make sure to read these stories before you deliver them, so that you tell these stories in a lively manner, without reading directly from the page. If you have a photocopy machine available, you may make copies for each girl.
- **Role Plays:** If the girls in your group enjoy working together outside of the savings group meetings, you may choose to have them prepare role plays together and present them during the meetings. This can save time and increase opportunities for the practice and application of the learning.
- **Pictures:** Another way of making learning sessions more lively and engaging is to include pictures. Pictures are provided as cards with the Trainer's Guide. However, if you lose a card, or prefer not to use the cards, you can simply show the girls the pictures directly from your Trainer's Guide. Alternatively, you can bring in real objects to represent the pictures.
- **Suggested Visitors:** Session 7 is an ideal session to follow with a visit from a woman (or women) from the local community to speak about options for earning money. However, we suggest that any time it is convenient and possible to bring in a guest speaker, you do so. Girls will always benefit from meeting and learning from women they identify with who can serve as positive examples and/or role models.

As you read the step-by-step instructions, give yourself permission to imagine a training session that is active, sometimes noisy, and fun. As the trainer, you will not be doing all the talking. Instead, you will be part of a dynamic learning process.

TRAINING TIPS AND TECHNIQUES

This Trainer's Guide is full of activities that require organizing participants into pairs or small groups. The instructions frequently direct you to do this, but usually leave the method up to you, the facilitator. This section offers a mini catalog of techniques for forming pairs and small groups. Ideas for facilitating group introductions are also included. You will find these handy at the opening of a workshop, and you may also find reason to do introductions again at a later time.

A. Forming Pairs

1. Form pairs by dividing the total number of participants in half. Ask participants to count off up to the number that represents half of the total. For example, if you have 20 participants, they will count off up to 10 and then start again at 1. The two people who have the same number are partners (the 1s, 2s, 3s, etc.).
2. Ask participants to turn to the person on their right (or left). This person is their partner.
3. Create sets of pairs constructed around opposite words or similar objects or first and last names of famous people. The number of pairs you create should equal half the number of participants. Each pair must have two parts. Write one word of each pair on a slip of paper. Ask participants to draw a slip of paper from a container and find the other half of their pair. This is their partner. Some examples for a group of 10 participants include:

Opposites		Matching objects		Famous people	
black	white	bed	sheets	Nelson	Mandela
sad	happy	table	chair	Wangari	Maathaa
dark	light	camera	photograph	Mwai	Kibaki
tall	short	car	driver	Sophia	Abdi
wide	narrow	shoes	socks	Jomo	Kenyatta

The group's theme can provide the inspiration for your selection of paired words. Or, select famous people who are relevant to the age range of your participants. For example, music, sports, and movie stars tend to work well with young people.

B. Group Introductions

When you first begin meeting together as a group, all participants should introduce themselves. You can make this as fun or as serious as you feel is appropriate. Here are some ideas for introductions:

1. Participants can simply give their name and their school, or the area they live. Or you can ask each person to say something unusual about herself, to help the others remember her.

2. Go around and instruct participants to state their name, favorite food, or favorite animal. You can be creative and think of a different category that may be more enjoyable or relevant to your participants.
3. Distribute paper and markers or colored pencils to each participant. Ask them to draw a picture that tells the others something important about themselves. Give them five minutes to draw. Then, one by one, ask each person to give their name and explain her picture. Additionally, you can collect the pictures, post them on the wall or on a tree, and sometime later in the day have a contest to see who can match names to pictures.
4. Instruct participants to form pairs (see Section A above), and tell the partners to introduce themselves to each other. Give them five minutes to talk to each other. Then ask each person to introduce her partner to the group.
5. Ask participants to form a circle. Explain that each person must state certain information when introducing herself (you might add "something different or special about yourself" to the normal information like name, school, favorite food, or main interests). Then toss a soft ball (or rolled up sock) to someone in the circle who introduces herself. After she has introduced herself, she tosses the ball to someone else in the circle. The game continues until each person has had a chance to give an introduction.

C. Ways to Form Groups

1. Count off. For example, ask participants to count off by 4s. One by one, each participant will say a number (the first participant says "1," the second says "2," and when it is the fifth participant's turn, he will start again at 1). When everyone has counted, instruct participants to form groups with people who have the same number. In the end, you will have four groups.
2. Make simple puzzles with 3-5 pieces each. Distribute the puzzle pieces to participants and ask them to find all of the others who have the pieces to complete their puzzle. Be sure to use simple puzzles and have the same number of puzzle pieces as participants.
3. Ask participants to stand in line in the order of their birthdays—month and day only—and then count off (such as 1 through 3) to form groups.
4. Assign colors, symbols, or pictures at random. Instruct participants to find all others with the same assigned color, symbol, or picture.
5. Place the names of four well known musicians in different places around the room and ask participants to stand next to their favorite. If everyone flocks to the same musician, you will have to adjust the exercise so that you end up with more than one group. For example you can ask participants to move to their second favorite musician.

6. Select four different animals (or whatever number of groups you want to create) and write the name of each animal on several slips of paper. The number of slips will depend on how many participants will be in each group. For example, if you have 16 participants, you can make four groups of four people. In that case, you will write the name of each animal on four slips of paper. Each participant will draw one slip of paper from a container. Tell participants that when you say “now,” each person must make the noise of the animal written on her slip of paper. While making their noises, participants must look and listen for those making the same animal noise they are making. These people are their group members.

LEARNING PRINCIPLES AND PRACTICES TO KEEP IN MIND

The box below is a reminder of some important principles and practices of youth learning to keep in mind as you lead each session. Remember that you, the trainer, do not have all the answers. The participants come to the learning sessions with a great deal of experience and have many things to add. It is important that all participants (including you) teach and learn.

IMPORTANT PRINCIPLES TO REMEMBER

- Create a **safe** learning environment.
- Give feedback to the participants and **praise** them for their efforts.
- Think about ways of making the topic **useful** to all participants present.
- Let the participants know that you are a **learner** with them, as well as a leader and a mentor.
- Promote conversations and questions that allow young people to **explore** and **clarify** their values as they develop a sense of self.
- Use a **variety** of activities that are appropriate for different maturity levels to cover young people’s many developmental stages.
- Make the learning **relevant** to young people’s current situation. Be cautious about asking them to project far into the future.
- **Anticipate** that young people may have limited experience with a topic. Stories may have to substitute for real-life experience.
- Be sure that throughout the session there is an opportunity for **thinking, acting, and feeling**.
- Include current **media** to ensure relevance of the topic and to promote discussion.
- **Engage participants’ families and communities** to connect with the program, understand its content, and support the young people in changing behaviors and meeting goals.
- Encourage humor and use interactive games so that the training is dynamic and **fun!**

DREAM BIG! SHILLINGS FOR OUR FUTURE: LEARNING SESSIONS AT A GLANCE

The goal of these sessions is to help girls manage their money effectively. See the proposed order of integrating the financial education sessions into the overall AGI-K curriculum above.

The table on the next page presents the module’s learning sessions and their purposes.

FEATURES OF THE LEARNING SESSIONS

Each learning session in this module begins with a summary page that contains the following:

- ♦ Learning objectives for the session.
- ♦ List of materials needed to prepare **before** each session. Being prepared for the learning session will make your job much easier. **Review this information carefully.**
- ♦ Estimated time needed to conduct the session.
- ♦ List of the steps for each activity. The guide provides detailed instructions for the learning activities that will help participants learn and work with the concepts of the session. Please follow the steps as outlined. However, you should use your own words to explain each point.

Special features for the trainer to note include the following

= highlights **specific open questions** to ask participants, or further explanations or instructions to give them

[*Square brackets*] = the “correct” answer to expect from a technical question

(Parenthesis) = additional instructions or information

SESSION TITLE	PURPOSE OF THE SESSION
1. Dream Big!	<ul style="list-style-type: none"> Discuss participants' dreams for the future Analyze the strengths, weaknesses, opportunities, and threats for Zahra through her story Analyze the strengths, weaknesses, opportunities and threats to achieving future dreams using a SWOT (Strength, Weakness, Opportunity, Threat) diagram
2. Why Save?	<ul style="list-style-type: none"> Introduce and recite the "Eight Steps for Savings" Identify and compare the saving goals of adults and young people Determine personal savings priorities
3. Choose a Savings Goal	<ul style="list-style-type: none"> Recite the "Eight Steps for Savings" and three categories of saving from Session 2 Analyze Halima's savings goals Participants describe their own saving goals
4. Make a Savings Plan	<ul style="list-style-type: none"> Calculate the time and money needed to achieve a savings goal Develop a savings plan for a savings goal Discuss the savings plan of a volunteer in the class
5. Learning About Home Banks	<ul style="list-style-type: none"> Learn what a home bank is and discuss experiences using a home bank Identify and list safe places to store a home bank Discuss keeping a record of savings
6. Exploring Options for Earning Money	<ul style="list-style-type: none"> Identify various options for increasing money earned Explore ways to improve existing income-generating activities Consider new ways to earn money
7. Girls' Money and the Risky Income Cycle	<ul style="list-style-type: none"> Explore how adolescent girls in their community make and spend money Discuss the risks and risk-reduction strategies of girls' income cycle
8. Know the Difference Between Needs and Wants	<ul style="list-style-type: none"> Distinguish between needs and wants Describe Latifa and Abida's needs and wants using a story
9. Control Spending	<ul style="list-style-type: none"> Understand the idea of making spending priorities Practice making a personal budget
10. Think About the Future: Money In and Money Out	<ul style="list-style-type: none"> Report the ways in which a girl (Naima) plans ahead for her income and expenses Describe the behavior of someone who does not plan ahead

11. Save Regularly!	<ul style="list-style-type: none"> Determine whether statements about savings behavior are true or false Evaluate the savings behavior of two cousins
12. Save in a Safe Place	<ul style="list-style-type: none"> List safe places for keeping savings at home
13. Dealing with Setbacks in Saving	<ul style="list-style-type: none"> Explore the challenges and possible setbacks in saving Understand difficulties encountered when plans don't go as planned Understand how to deal with setbacks in saving
14. Your Own Money vs. Someone Else's Money	<ul style="list-style-type: none"> Differentiate between one's own money and borrowed money Identify characteristics of borrowed money Understand the importance of being in control over your own money
15. Talking About Money	<ul style="list-style-type: none"> List who they talk about money with and what they talk about Describe the possible outcomes of discussing money
16. The DOs and DON'Ts of Talking About Money	<ul style="list-style-type: none"> List reasons for communication breakdowns Identify the "dos" and "don'ts" of good communication on money
17. Resolving Conflicts About Money	<ul style="list-style-type: none"> Recognize the DOs and DON'Ts of good communication in a real-life experience Identify good communication skills in a sample dialogue
18. Role Play Resolving Conflicts	<ul style="list-style-type: none"> Practice using communication skills to resolve conflicts about money through role plays Identify more than one solution to sample conflicts
19. Our Journey to Good Money Management	<ul style="list-style-type: none"> Reflect on dreams for the future Revisit key topics from the FE curriculum Celebrated the completion of the FE course

TERMS AND DEFINITIONS

A challenge of working with girls with low levels of financial literacy is helping them to understand the important terms in money management. The following **bold** terms are used in the learning sessions, and their explanations and definitions are provided for your reference.

Advantage: Any condition, situation, or opportunity that helps someone to succeed or benefit.

Budget: A written plan that estimates future income, expenses, and savings.

Conflict: A situation when two or more people fight or disagree.

Deficit: When there is not enough money to cover all costs at the end of a budget period.

Disadvantage: A negative condition or situation that can cause someone harm.

Expenses: Money out—this can be money spent for any purpose.

Goal: Something someone wants to achieve in the future—perhaps in school, perhaps related to family, perhaps related to work. A goal might be to visit a relative who lives in another place, or to learn a new skill, like sewing or typing.

Short-term goal: A goal that can be achieved in a relatively short period of time, such as 1–2 months.

Long-term goal: A goal that will take a long period of time to achieve, like 1–2 years.

Income: Money in—this could be regular or irregular, from a job, or even a gift.

Loan: A sum of money that is borrowed and that must be paid back.

Needs: A basic necessity that you cannot live without—like food, water, and a place to live.

Outcome: The result of something.

Saving: Putting money aside for future use.

Savings Plan: A written guide for how to manage and save money to achieve a savings goal.

Self-Employment: A self-employed person operates his or her own business or job, and makes all of the necessary decisions related to the business—such as working hours, investment, products and services, etc.

Surplus: Money remaining or left over (at the end of a budget period—like a week or month).

Wants: Something that is desired, but not necessary for daily survival—such as sweets, makeup, hair extensions, etc.

TRANSLATION OF KEY TERMS

	Term in English	Term in Somali
1	accountant	Xisaabiyaha

1

Dream Big!

OBJECTIVES

By the end of this session, participants will have:

- Discussed their dreams for the future.
- Analyzed the strengths, weaknesses, opportunities and threats for Zahra through her story.
- Analyzed the strengths, weaknesses, opportunities and threats to achieving future dreams using a SWOT (Strength, Weakness, Opportunity, Threat) diagram.

MATERIALS

- Flipchart
- Zahra's Story

CHARTS

- SWOT Diagram

TIME
45 MINUTES **ACTIVITIES**

1. What are your dreams?
—15 minutes
2. Zahra's story
—15 minutes
3. The SWOT diagram
—15 minutes

activity 1

WHAT ARE YOUR DREAMS?

(15 MINUTES)

Welcome girls to the learning sessions on financial education.

Explain:

We are meeting together in our Safe Spaces group to support each other, and to learn about how to make good decisions about our lives. Now, we are going to start learning about how to plan for and make good use of our money, too. This is because money is also important when it comes to making choices. This type of learning or training is called “financial education.”

Say:

I want you to think about your dreams. Close your eyes for just a moment, and think about how old you are now. How old will you be in five years' time? Think about yourself five years from now when you are older.

Where are you living? What are you doing? What goals or plans have you achieved?

Now, I want you to think about one specific dream you want to achieve in five years' time. Got it?

Make sure that all girls have thought of at least one dream. Then, ask 3–4 volunteers to share their dreams.

Then make the connection between the girls' “dreams” and financial education.

Say:

Now that we have all thought about some of our dreams I want everyone to stand up and clap if reaching your dream will involve having some money.

As we can see, most of our dreams require some money to be reached. So we need to be wise about how we earn, spend, and save our money so that our dreams can come true.

activity 2

ZAHRA'S STORY

(15 MINUTES)

Say:

If we want to achieve our dreams, we have to plan and prepare using our good judgment—including how we manage our money. I am going to tell you the story of a childhood friend, Zahra.

Let's listen to the story of Zahra. While you listen, think about how she prepares for her future, and what some of the things are, both inside her and around her, that either support or block her as she tries to achieve her dreams.

Read the story of Zahra, found on the next page. Quickly de-brief the story:

Ask:

What happened in this story? Who can tell me in her own words?

What is Zahra's dream?

[To become a henna artist.]

Next introduce the idea of Strengths, Weaknesses, Opportunities, and Threats. If you have a flipchart or blackboard, draw an outline of a girl to refer to as

you ask the following questions, and then note down girls responses under the headings Strengths, Weaknesses, Opportunities, Threats (or you can just show them the picture found at the end of this session).

Say:

We all have inside us and around us things that either support or block us from reaching our dreams. Let's use Zahra's story to try and understand what this means, and why it is important to think about:

- **What were some of the Strengths—or supports inside her—that helped Zahra achieve her dream?**

[She is helpful and cares for her family; she is hardworking and knows how to earn money; she is good in school and she received a scholarship.]

- **What were some of Zahra's Weaknesses—or blocks inside her—that got in the way of her dream?**

[She is stubborn and made a bad decision to drop out of school to become a henna artist.]

- **What were the Opportunities—or supports around her—that could help Zahra achieve her dream?**

[She has a loving mother who helped her and looked for her when she went missing; her school fees were paid, and so were those of her sisters; there is a youth center in her community that counseled her and helped her with training to become a henna artist.]

- **What were some of the Threats—or potential blocks around her—that made her dream harder to reach?**

[Her family is struggling with money.]

ZAHRA'S STORY

Zahra is 12 years old, and the oldest in her family. She stays with her mother and her three sisters in a two-room “manyatta.” Her mother struggles to buy food and also cloth her girls but she is proud of Zahra since she is so helpful with housework. Zahra even earns some money to help the family by washing clothes for an elderly neighbor and by selling sweets to other pupils at her school.

Luckily, Zahra and her sisters are smart, and Zahra’s mother was helped by the local mosque with scholarships. All four of her children got sponsors who pay school fees for them in a nearby day school—though Zahra has to use some of the money she earns to buy school supplies.

As a young girl Zahra always told her mother that she wanted to be a henna artist, just like the Famous Farhia. Her mother always tells her: “that is not a future job for a person I gave birth to!” So every time Zahra would run to her friend’s place and practice applying henna without her mother’s knowledge. She also used some of the money she earned to buy refreshments for her friends at school—even if it meant not being able to buy all of the school supplies she needed, or saving any money to buy new henna like she wanted to.

When Zahra reached class 6, she dropped out of school. Even when her mother pleaded with her to stay in school and reminded her about her sponsorship she refused. One of her friends from the henna art group said she knew about a way she could make “easy money” and tricked her into leaving home and becoming a wedding henna artist. Zahra’s mum promised not to give up on her daughter so she visited a youth center and talked to the staff who agreed to help her find Zahra and also provide counseling services. Finally she came back home and they trained her to be a professional henna artist. Zahra is now one of the prominent henna artists in her village that is sponsored by the youth center.

activity 3

THE SWOT DIAGRAM

(20 MINUTES)

As we have just explored through Zahra's story, if we want to reach our dreams we have to think carefully about the things inside us, and the things around us, that can either support us or block us.

In fact, we can all use a picture like this (*show SWOT Diagram on a flipchart, blackboard or in your Dream Big Curriculum*) to think carefully about the things inside of us and outside of us that can support or block us as we try to achieve our dreams.

I want you to continue to think about the dream you just chose earlier in today's session—and I want you to work with a partner to try and identify some of the Strengths, Weaknesses, Opportunities, and Threats that might impact you reaching your dream.

Make sure all the girls have a partner—and then go through the following questions step-by-step, giving the girls time to share a few ideas with each other (and referring to your SWOT Diagram at each step).

Step #1. Let's start by speaking to our partner about some of our Strengths—or things I have inside me that might help me to achieve my dream. Strengths are all the things you are good at or things that you have within you that could help you achieve your goals. They

could be part of your personality, skills that you have, or things that you are good at.

Step #2. Now, even though this might be hard to do at first, let's speak to our partner about some of our Weaknesses—or the things inside me that might block me from reaching my dream. Weaknesses are things about you that you may need to work on—or improve—to achieve your dream. For example, you may not be good at time management, do not know how to use a computer very well, or it may even be that you are poor at skinning animals or preparing traditional drinks.

Step #3. Next, let's share a few examples of our Opportunities—or some of the things around me that might help me to achieve my dream. An opportunity could be something like computer classes being offered next month at a discount in Wajir town. Or, you have seen that there is a need for more tailors in your neighborhood. This means that you could take a computer class for a cheaper price, or that you could make money as a tailor, for example.

Step #4. Finally, and again this might be hard, let's speak to our partner about some of our Threats—or things around me that might block me from reaching my dream. This is anything

outside you—in your neighborhood, at your school, at your work, in your family—that is a challenge. If you have a small shop, a threat to your success is if there are many other people selling the same things near you. That means that you might not have good business. Another example that girls have mentioned in other classes is an unplanned pregnancy. If you become pregnant or have a child before you are ready, you might have to stop studying. This means that you might not realize your dream of finishing secondary school.

After going through each of these four steps, invite girls to ask any questions they might have about using a SWOT Diagram, and let them know that it is a skill they will continue to use in future sessions.

It is important that when you make plans to achieve your dreams you think about what will help you and what might make it harder for you. That way you can take advantage of the good things and plan how to work with the things that might be hard. Over the next several sessions we'll talk a lot more about your dreams, plans, and goals for the future, especially those related to money, so we can all achieve those dreams.

THE SWOT DIAGRAM

Things I inside me and around me that may either support or block me from achieving my dream.

2 Why Save?

OBJECTIVES

By the end of this session, participants will have:

- Recited the “Eight Steps for Savings.”
- Identified and compared the savings goals of adults and young people.
- Determined their own savings priorities.

MATERIALS

- Soft ball or rolled up sock that can be easily tossed among the participants

CHARTS

- Eight Steps for Saving

TIME
30 MINUTES

ACTIVITIES

1. The “Eight Steps for Savings”—10 minutes
2. Why do we save? Pass the “ball”—10 minutes
3. Many reasons to save: What are your priorities?—10 minutes

activity 1

THE “EIGHT STEPS FOR SAVINGS”

(10 MINUTES)

Say:

Today we start the first learning session in our financial education program. Our goal is to learn one important way of managing our money. We will start by talking about putting money aside because it is the key to being wise about money. We call “putting money aside” saving. Later on, we will also talk about other things related to money—like how to talk to other people about money and different ways to earn money.

So let's start with a short activity to find out a little more about what managing money really means.

(NOTE TO TRAINER: For the game below, make sure to keep the group moving. If you stop to discuss each statement, the time needed for the activity will increase greatly. Keep the group moving to keep the energy of the game!)

Explain:

I am going to say a series of statements and ask you to stand up for each one that is true for you. Stand up if you:

- Walked here today
- Are wearing green
- Never saved money before AGI-K
- Like to spend money
- Know how much you spent on food last week

- Wish you had more money
- Are saving for something specific you want
- Think saving is important
- Think saving money is difficult

Ask:

For those of you who think that saving is important, why do you think so?

[Helps you use your money better, helps you depend less on other people, makes you feel secure when you have a problem and need money, helps you to plan for the future and achieve those plans.]

Why is saving money difficult?

[Do not have regular income, do not have any extra money, give any leftover money to parents for household expenses, spend extra money on things like sweets or make-up, do not have a safe place to keep money aside.]

What would make you want to save money?

[Take care of personal needs/wants, avoid depending on other people, be able to make own decisions, help out family in household needs.]

What would make you not want to save money?

[It is not safe to save, you can lose your money, money is too little to save, don't know how to save.]

Explain:

Managing money involves all these things:

- saving money
- spending money
- planning how you will spend your money, and
- keeping track of how you spend your money.

Since most of us do not have enough money to pay for everything we need and want, we have to make choices about what we will buy and what we won't. We try to save for things we will want in the future. We figure out how to stretch our money to cover the necessary expenses we face. It can be hard.

Show the “Eight Steps for Savings Chart” or refer to sample on the next page.

Explain:

In the next few sessions, we will focus on the value of saving, and learn things we can do to help us save. We call these the “Eight Steps for Savings.”

As you state the Steps for Savings, assign each one to a group of girls, so that every girl has an assigned Step. Then, later, when you want to review the Steps, you can ask girls to recite them back!

EIGHT STEPS FOR SAVINGS

1. Choose a Savings Goal
2. Make a Savings Plan
3. Know the Difference Between Needs and Wants
4. Control Spending
5. Think About the Future: Money In and Money Out
6. Save Regularly
7. Save in a Safe Place
8. Deal with Setbacks in Saving

activity 2

WHY DO WE SAVE? PASS THE “BALL”

(10 MINUTES)

Ask participants to stand and form a circle.

First, explain how “pass the ball” works. You (the trainer) will say a sentence that is unfinished and throw the “ball” (ball of string, rolled up sock, or balled up paper) to someone in the circle. That girl has to repeat the beginning part of the sentence you have started and “answer” it, or complete the sentence.

For example:

FACILITATOR/

MENTOR: Girls my age save money to _____.

GIRL: Girls my age save money to buy a new hijab.

After answering, the first girl will toss the ball to another girl in the circle who has to repeat the same sentence beginning and provide her own ending.

This activity will be done in three rounds with the following three sentences. You decide when to move on to the next sentence. When the participants start to appear bored or tired with one sentence, move on to the next. You do not need to wait until everyone has provided an ending to each sentence. It is better to keep things moving at a lively pace!

Use the following three sentences:

Girls my age save to _____.

Boys my age save to _____.

Adults often save to _____.

After the three rounds, summarize what you have heard. Highlight the differences and similarities between what girls, boys, and adults save for.

activity 3

MANY REASONS TO SAVE: WHAT ARE YOUR PRIORITIES?

(10 MINUTES)

Explain:

You have named many different reasons to save. Most will relate to one of the following “main reasons” (or “categories”) for saving.

1. The first main reason is:

personal or family use, which can include food, clothes, rent, or snacks.

What are other examples of “personal or family use”?

[Hair maintenance, sanitary towels, lotion, firewood, kerosene, etc.]

2. The second main reason is:

emergencies, those unexpected events that we need to deal with right away. Some examples are illness, accidents, or natural disasters.

What other emergencies can we save for?

[theft, fire, parent loses a job, drought, etc.]

3. The third main reason is:

future opportunities, like those ideas some of you have for the future. We can save to meet these goals. We might save money for school fees, to get training in a skill or trade, for the next planting season, to move into our own house/room, or to start a business.

What other future opportunities can we save for?

[Education, wedding, training or skills school, children's educations, a house or land, a lump sum of money to start a business, etc.]

While participants are still standing, assign a place for each of these three main reasons (if you are inside, you can use a corner, the door, a window; if you are outside, select or mark three distinct spots—for example, near a tree, bush or rock—close by). When you have pointed out the three places:

Say:

Your job is to decide which of these main reasons, or “categories” of reasons to save is the highest priority for you. Choose one, and go stand in the location assigned the category you have selected as your most important reason to save. You have 15 seconds to make your choice and move!

Once everyone has moved to the place that marks the savings category of their choice,

Say:

Now, spend two minutes sharing with the others who have chosen the same priority why you think this reason to save is the most important.

(NOTE: If all the girls move to one or two of the categories, you will have to ask for volunteers to “choose” the one that has not been selected and ask them to move to the spot that does not have enough people.)

(activity 3 continued on next page)

activity 3 *(continued)*

Select a volunteer from each group to explain to everyone why they chose the category they did.

Ask the other two groups:

Do you agree? Why or why not?

Start a discussion—but don't let it become a shouting match or fight. Make sure that each group has an opportunity to explain why their selected category is a high priority. When the discussion is over, ask participants to sit down.

Explain:

You might have guessed by now that there is no wrong answer for which of these categories is the most important. They are all good reasons to save, and the importance depends on the individual's or family's needs and wants. The level of importance might also change over time. But in reality it can be difficult to save for all three. Sometimes you have to decide what is most important to you.

Ask:

What happens when a girl needs money for these things, like personal needs or to deal with an emergency, but she does not have money of her own?

Listen to girls' answers to the question. The answers can vary widely from not buying items/going hungry to do work to earn money to getting money from other people.

When they are done,

Explain the following:

Sometimes when girls need money to buy personal items, help their family with food or rent, or manage an emergency that might come up, they find other ways to get the money if they do not have their own money saved up. They may borrow money and not have the means to repay it. So, one important reason to save is that when these needs come up—personal items, future use, or emergencies—you have your own money to use instead of putting yourself in a potentially risky situation to get money. We will talk more about this in the coming sessions.

3 Choose a Savings Goal

OBJECTIVES

By the end of this session, participants will have:

- Recited the “Eight Steps” and three categories of savings from Session 2.
- Analyzed Amina’s savings goals.
- Described their own savings goals.

MATERIALS

- Amina’s Story

TIME 30 MINUTES

ACTIVITIES

1. Review the “Eight Steps for Savings”—5 minutes
2. What is a goal?—5 minutes
3. What are Amina’s goals?—10 minutes
4. What are your savings goals?—10 minutes

activity 1

REVIEW THE “EIGHT STEPS FOR SAVINGS”

(5 MINUTES)

Explain:

We have talked together in our savings group about why saving is a good thing.

Review the three categories of savings—Personal or Family Use, Emergencies, Future Opportunities—from Session 2, Activity 2. If girls do not remember, remind them as a short review.

Ask:

What are three categories of saving from the last meeting?

[Personal or family use, emergencies, future opportunities.]

Say:

As we know, savings can help us start a business or respond to an emergency or buy something we really want. We also know how hard saving money can be. To make it easier, we are going to talk about eight steps we can use to help us save.

If you remember, I assigned you each a step to remember in the first session. We will talk about one strategy each week until we've reviewed them all!

Ask girls to recite the Steps they were put in charge of during the last week. If girls cannot remember, remind them, if possible, show the picture cards. Make sure all the steps below are recited.

EIGHT STEPS FOR SAVINGS

1. Choose a Savings Goal
2. Make a Savings Plan
3. Know the Difference Between Needs and Wants
4. Control Spending
5. Think About the Future: Money In and Money Out
6. Save Regularly
7. Save in a Safe Place
8. Deal with Setbacks in Saving

activity 2

WHAT IS A GOAL?

(5 MINUTES)

Ask:

Remember your dreams about the future from the beginning of our sessions in financial education? What are some of your dreams?

After girls have given examples of their dreams,

Explain:

These dreams about the future can be called goals. A goal is something you want to achieve in the future—perhaps in school, perhaps related to your family, perhaps in your work. A goal might be to visit a relative who lives in another place, or to learn a new skill, like sewing, skin art, etc.

Goals that involve what we want to do with the money we save are savings goals.

activity 3

WHAT ARE AMINA'S GOALS?

(10 MINUTES)

Explain:

I am going to read a short story about a girl your age. Her name is Amina. As you listen to the story, pick out her goals on money.

When you have finished reading the story,

Ask:

What are Amina's savings goals?

[Transportation to her sister's town, a gift for her sister's baby, money to buy shoes.]

Which of her savings goals can be met within a few weeks?

[Transportation money, the baby gift]

Which savings goal will take a longer time?

[Money for shoes.]

What can Amina do to meet her goals?

[Ask for many different solutions from participants such as different jobs she could do, expenses she could cut down on, etc.]

AMINA'S STORY

Amina is 12 years old and lives with her mother and younger brother. Her older sister, Halima is married and lives in Garissa town. Halima just had a baby girl, and Amina is eager to visit, to spend time with the baby, and help her sister.

Amina will need money for transport and a small gift for the baby. A cute baby shawl would be perfect! But she can't take money from her home bank for this trip because she is saving that money to buy new school shoes. Amina's dream is save enough money to buy herself shoes so that she can finally stop going to school bare foot. She hopes that her uncle will ask her to fetch water for his cattle so that she can get the money she needs for the trip.

activity 4

WHAT ARE YOUR SAVINGS GOALS?

(10 MINUTES)

Explain:

Like Amina, many of you hope to achieve something by saving.

First, close your eyes and think of one savings goal you have that you can achieve in a relatively short time—within the next 1-2 months. Got it? That is your first goal. Okay—keep it in your mind for just a moment!

Now, think about a different goal, something you want to be able to purchase that will probably take you a little longer—like 1-2 years—to save for.

Turn to your neighbor and share with each other your two goals.

Check girls' understanding by asking for some examples of their first and second savings goals.

After asking 3-4 volunteers,

Explain:

The first savings goal you just thought of—the goal that will take you just a few months—can be called a **short-term goal**. You can achieve short-term goals in a relatively short amount of time.

The second savings goal you just thought of—the one that will take a year, or more!—is a **long-term goal**. This goal is like a big dream that you can achieve some time in the future.

Ask:

How can having a savings goal help you to save?

[When you are saving for something that you really want, or that is really important to you, you are motivated to save and have discipline to control your spending.]

Say:

Between now and our next meeting, think about your savings goals every day!

4 Make a Savings Plan

OBJECTIVES

By the end of this session, participants will have:

- Calculated the time and money needed to achieve a savings goal using play money.
- Developed a savings plan for a savings goal.
- Discussed the savings plan of a volunteer in the class.

MATERIALS

- Picture Cards
- Savings Plan Worksheet (for groups with literate girls)

TIME 30 MINUTES

ACTIVITIES

1. Review savings goals
—5 minutes
2. Make a savings plan
—20 minutes
3. Review savings plans
—5 minutes

activity 1

REVIEW SAVINGS GOALS
(5 MINUTES)

Ask:

What is a savings goal?

[A savings goal is something you save money for. It can be something big or small you want to buy, or a trip you want to take.]

What are some of your “small” savings goals?

What are some of your “big” savings goals ?

activity 2

MAKE A SAVINGS PLAN
(20 MINUTES)

NOTE: There are two options for this activity:
1) Use the picture cards provided in the toolkit for Session 4 or, if you choose not to use them, 2) assign each group of girls one of the objects from below.

Separate the girls into groups of three or four.

Explain:

Today we will learn how to make a savings plan. First, you will each be assigned a savings goal for this activity.

If you are using the picture cards, distribute a card with a savings goal to each group. If you are not using the cards, simply assign a goal to each group.

Say:

You and your partner(s) need to work together to answer three questions:

- 1. How much money do you need for this savings goal?
- 2. How much money do you think you can save each week toward this goal?
- 3. How many weeks will it then take you to reach this savings goal?

Gather around me so we can do an example together. For example, let’s say that a girl like you has a savings goal is to buy a new necklace in the market.

(activity 2 continued on next page)

Jewelry	Hijab	Lotion	Mobile phone	Goats	Oil lamp
Pots	Bicycle	Henna	Shoes	School supplies	Sewing machine

activity 2 (continued)

Ask:

How much might it cost?

Accept a reasonable answer, write it on the board or flipchart, then

Ask:

How much money do you think a girl like you might be able to save each week?

Allow some discussion from girls, and come to an agreement on a realistic amount for an average girl to save each week. Write the weekly savings amount that you have agreed upon on the board or flipchart. Then,

Ask:

Now, how many weeks would it take for her to reach her savings goal?

Girls should be able to calculate based on the information on the board. When a girl answers correctly (or help the girls answer if no one can answer correctly) write the following tip on the board, or have it prepared on a flipchart in advance:

TIP:

**What I plan to save ÷ What I can save each week
=
Number of weeks I need to save in order
to meet my savings goal**

EXAMPLE: If the girls say that the necklace will cost 25 Ksh., and they can save 5 Ksh. each week, then the number of weeks to reach their savings goal is $25 \div 5 = 5$ weeks.

NOTE: If you have copies, give a copy of the Savings Plan Worksheet (found on the next page) to each girl now. If you do not have copies, simply copy the worksheet onto the chalk board or a flipchart and display now. Point out that the tip is also found on the worksheet. Alternatively, use the fake Shillings in the training kit to illustrate how this can be done in practice. For example, have the girls place the amount of money they need to save on the second box and the amount of money they can save each week on the third box. They can use the fake money to figure out how many weeks in total it will take them to reach their goal.

Explain:

We have just made a savings plan for a girl like us who wants to buy a new necklace. Now, do the same for the savings goal you have been assigned (from the cards or from the ideas generated in Activity one). Together, you will need to:

- Decide how much money you will need for your savings goal in total.
- Agree on how much money you could save each week.
- Using that number, decide for how many weeks you will need to save in order to reach your savings goal.

Allow about five minutes for girls to discuss in their groups or pairs. They can also use the fake Shillings to make their savings plans. While the girls are talking, circulate to make sure that everyone understands the task.

activity 3

REVIEW SAVINGS PLANS
(5 MINUTES)

When girls have had about 5 minutes to create their savings plans, ask a few groups to describe their saving goal and their savings plan to reach that goal. Ask the others for comments. Use the following questions to prompt comments if everyone is silent.

- Is their price realistic?
- Is the amount they plan to save each week realistic?
- What would happen if they could save more, or less money, each week?
[Save more—they would reach their goal in fewer weeks; Save less—it would take more weeks to reach their goal.]
- What could you do if you needed to reach your savings goal faster?
[Save more each week; change the goal to be less costly.]
- What should they do if they decide to save money every day, instead of every week?
[Do the same calculations, but then it will give them the number of days it will take to reach their goal instead of weeks.]

When everyone has finished,

Ask:

How do you think a savings plan can help you to save?

Allow girls to discuss the topic, and encourage them to save for their goals in their own lives!

SAVINGS PLAN WORKSHEET

Sample

Savings Goal	Total (Cost of item)	Amount you can save each week	Number of weeks you need to reach your goal
Short-term			
New shoes for Id UI Fitr	200 Ksh.	20 Ksh.	10 weeks
Long-term			
Attending a tailoring course	3,000 Ksh.	60 Ksh.	50 weeks (or almost one year)
Tip: To find out how many weeks it will take to reach your savings goal, divide the total amount of money you need by the amount you can save each week. Amount to save ÷ Amount you can save each week = Number of weeks it will take			

Do-it-yourself

Savings Goal	Total (Cost of item)	Amount you can save each week	Number of weeks you need to reach your goal
Short-term			
Long-term			

5 Save in a Safe Place

OBJECTIVES

By the end of this session, participants will have:

- Listed safe places for keeping savings at home.

MATERIALS

- The Story of Rafiqah
- The Story of Muna

TIME 30 MINUTES

ACTIVITIES

1. Safe places for keeping savings at home
—30 minutes

activity 1

HOME BANK SAVING

(30 MINUTES)

Say:

Saving can be difficult because there are so many demands on our money. When we are able to save, it is important to put our savings someplace safe, where they cannot be taken by someone else, and where we ourselves will be less tempted to spend them. Our “Savings Step of the Day” is: Save in a Safe Place!

Ask:

What makes a place safe for keeping money?

[where no one else knows about, where only you have access to the money, where only you can decide what to do with the money and when, where the money will not be stolen.]

Explain:

Rafiqah is 11 years old and lives in Griftu. Her grandmother gave her and her cousins Ksh. 50 each for Id Ul Fitr, Rafiqah plans to save this money to reach important goals.

Now, read the story of Rafiqah (found on the next page).

Ask:

What are Rafiqah’s savings goals?

[To buy pencils and drawing book]

How does Rafiqah get the money to save and achieve her goals?

[Fetches water for her uncle’s goats]

How will having a home bank help Rafiqah to reach her goals?

[She is able to save, she is less tempted to use her money.]

What are the advantages of saving at home for Rafiqah ?

[She is less tempted to use her money; easier to hide the money from other people; she can easily use the money for other things to help her family.]

What are the challenges of putting your savings in a home bank?

[You can easily access the money and use whenever you want – whether it is a need or a want.]

Next, read the story of Muna (found on the next page).

Ask:

How does keeping money under her mattress make it harder for Muna to save?

[Others who need money will pressure you to give it to them; It can be easily stolen or borrowed.]

What are the advantages of keeping money under the mattress for Muna?

[She has easy access to her money that she can spend on things she wants or use to help her family.]

Which place do you choose for saving your money? Why?

Allow the girls to discuss their choice for savings realistically. There may be reasons they choose to save in different places. Encourage them to use the home banks because they are the nearest and most efficient in their context. The objective of the lesson is to help them compare the options and think about the best and safest place for their own savings.

Be sure to mention that other banking options are not available in rural Wajir.

THE STORY OF RAFIQAH

Rafiqah is a girl with a dream: she has planned to buy school items like pencils and drawing books because she likes drawing.

Rafiqah keeps her savings in her home bank. Rafiqah's home bank is hidden in a safe place where no one can see it so it cannot be stolen. She puts the 50 Shillings from her grandmother in her home bank. Rafiqah wants to have some money to continue depositing and keep saving up until she has enough for the drawing materials—which cost 100 Shillings. She saves some little money which she is paid by her uncle for fetching water for her uncle's goats over the weekend like 5 shillings or sometimes 10 shillings.

When Rafiqah's brother gets married, she really wants a new dress for the wedding. However, seeing her savings growing in her home bank encourages her not to take the money out, so she is able to decide not to buy a new dress. However, she did use some of the money in her home bank one day to buy some sweets. One day, her younger brother comes and demands some money from her, but because the home bank is hidden away and no one knows about it, she does not have to part with any money. Another day, Rafiqah's mother asks for 10 Shillings to buy some sugar, and Rafiqah wanted to help her mom so she went into her home bank and gave her the money. Even though it took a couple of months, Rafiqah was able to save 100 shillings in her home bank and she went and got the school supplies that she needed.

THE STORY OF MUNA

Muna wants to save some money to enroll in a club in her school but she needs some money for registration. She decides to hide her 50 Shillings under her mattress where she sleeps. Like Rafiqah, she also fetches water for her uncle sometimes.

Muna is easily tempted by sweets and biscuits she sees in the market. So, about once a month, she takes a little money from under her mattress. That makes her so happy! And sometimes, when she has fetched water, she puts the money back under her mattress.

One day, her uncle sees her put the money under the mattress, and he demands that she gives him 30 shillings one day to buy food. Her sister's chore is to sweep under the mattresses, so sometimes she takes money from Muna and uses it for her transport. The money also has gotten mixed up with dust and dirt. When the time comes to pay the first installment for the environment club, Muna realizes that she does not have enough money under her mattress.

6 Learning about Home Banks

OBJECTIVES

By the end of this session, participants will have:

- Learned what a home bank is and discuss how to keep it safe.
- Gained skills on keeping records related to home banking.

MATERIALS

- Home bank
- Ksh. 300 for each girl
- Flipchart and marker pens

TIME 50 MINUTES

ACTIVITIES

1. Discuss the home bank experience—10 minutes
2. How to keep your home bank safe—10 minutes
3. Keeping a record of savings—15 minutes
4. Distribution of home banks—15 minutes

activity 1

DISCUSS THE HOME BANK EXPERIENCE

(10 MINUTES)

Say:

Today we will be talking about home banks, what we know and don't know about them. Some of you may have heard or even used a home bank before.

Ask:

Who can tell what a home bank is?

[A safe place where people keep their money at home. It is a container or box that is custom made to store money; Can have a lock or not.]

Wrap up the definition of a home bank by saying:

"A home bank sometimes called penny (coin) bank or money box is the traditional name of a coin container used for saving money mainly coins but it can also be used to store notes. It can help you to reach your savings goals by putting money for savings away and out of reach."

Say:

Stand up if you know someone who has a home bank.

Ask:

Are there one or two volunteers who can share something about the person and their home bank?

[How they got/made the home bank, where they keep it, when they started saving, and how much they have saved since they started using it.]

Say:

Stand up if you have a home bank.

Ask:

Are there one or two volunteers who can describe their experience using a home bank ?

[How you got/made the home bank, where you keep it, when you started saving, and how much you have saved since you started using it.]

Thank the girls for their experiences and have them sit down.

activity 2

HOW TO KEEP YOUR HOME BANK SAFE

(10 MINUTES)

Say:

It is possible to save money at home in a home bank like our volunteers who have shared their experiences. However, it is very important to identify a safe place where one can keep their home bank so that they don't lose their savings.

Ask:

What are some of the safe places at home you as girls can keep a home bank?

Let the girls give you the options and list them on a flip chart depending on their answers consider the advantages and disadvantages and help them think and list only safe places, explaining why some areas may not be good to store the home bank.

NOTE TO FACILITATOR: Remind the girls that safety entails:

- *Accessibility:* girls should store their home banks in places where they can access it, and also keep in mind that not everyone should know where the box is.
- *Information:* who to tell and who not to tell about the home bank.
- *Location:* away from theft and destruction.

activity 3

KEEPING A RECORD OF SAVINGS

(15 MINUTES)

Say:

As we have learnt from previous sessions, it is important to keep written records of your plans about your money. In this session, we are going to learn about a very simple table that will help you keep track of how much money you have in your home bank and how much you have spent.

Draw the table below on a flip chart and give an example as follows:

DATE	MONEY IN	MONEY OUT	CALCULATION	NEW TOTAL
1 August 2015	300			300
11 August 2015	200		$300 + 200 = 500$	500
16 August 2015		50	$500 - 50 = 450$	450
18 August 2015	50		$450 + 50 = 500$	500
19 August 2015		20	$500 - 20 = 480$	480

activity 4

DISTRIBUTION OF HOME BANKS

(15 MINUTES)

Say:

In this session, we will give each one of you a home bank and Ksh. 300 to help you practice how to use the record keeping table and also to practice budgeting and saving at home.

Divide the girls into pairs and have them share their plans with their partner.

Ask for two to three pairs to share their plans.

Distribute the home banks and Ksh. 300 to each girl. Make sure they sign for the items.

Say:

Now that we have been learning about how important it is to save, we encourage everyone to use these home banks to keep your savings. We also hope that you will use the initial Ksh. 300 as a start to reach a financial goal or to practice your budgeting skills.

Say:

Everyone take five minutes now and think about how you will use the Ksh. 300.

Ask:

Will you save the Ksh. 300 and put the money toward a financial goal? How will you get any additional money you might need?

Do you have expenses that you will use the Ksh. 300 for? If so, how will you budget your money so that the 300 Shillings doesn't get used up right away?

7 Exploring Options for Earning Money

OBJECTIVES

By the end of this session, participants will have:

- Identified various options for increasing the money they earn.
- Explored practical approaches to improving existing income generating activities.
- Thought about new ways to earn money.

MATERIALS

None

TIME 55 MINUTES

ACTIVITIES

1. Identify current ways that girls earn money—10 minutes
2. Explore ways to improve existing income generating activities—25 minutes
3. Consider new ways to earn money—20 minutes

activity 1

IDENTIFY CURRENT WAYS THAT GIRLS EARN MONEY

(15 MINUTES)

Explain:

Today we are going to spend some time talking about earning money. To start let's play a small game that will help us to think about some of the current ways that girls like you earn money. In this game, I am going to mention three different ways of earning money. If you have any experience with the ways of earning money that I mention, then I will ask you to perform an action, and then give me an example.

Say:

If anyone in our group has ever earned money by doing a small job for someone else – please jump up and hop on one foot.

Now let's ask a few of those hopping to give us an example (and then we can sit back down again)

If anyone in our group has ever earned money by buying and selling things – please jump up and clap your hands

Now let's ask a few of those clapping their hands to give us an example (and then we can sit back down again)

If anyone has ever made something or grown something themselves and then sold it to earn money– please jump up and spin around

Now let's ask a few of those spinning around to give us an example (and then we can sit back down).

Say:

We can certainly see that girls in our group have lots of experience with different ways to earn money. I wonder how many of you have had experience with all three ways of earning money.

[Doing small jobs, buying and selling things, and making or growing something to sell]

If anyone here has experience doing all three of these things to earn money – then please jump up, hop on one foot, clap your hands, and spin around (all at the same time!!)

You are good examples of how hard girls work to earn money to help their families and reach their own goals – and today we have a lot to learn from you.

activity 2

EXPLORE WAYS TO IMPROVE EXISTING INCOME GENERATING ACTIVITIES

(25 MINUTES)

Now that we know about our existing experience in earning money, let's spend some time exploring ways that we can earn more money doing these same kinds of activities. To help us get started I want to tell you Munira's story. (Read the Story of Munira).

Let me ask you a few questions about the story.

Why was Munira trying to earn some money?

[to help buy food for her family]

What business did she start at first? What challenge did she run into?

[making beaded jewelry; others copied her business and started making and selling jewelry, so her business dropped]

What were some things she did to try and earn more money?

[(i) Adding variety to the product/service she was selling (selling matching sandals); (ii) Asking her customers about improvements she could make; (iii) Keeping her eyes and ears open for new ideas, and improved methods – such as buying beads in bulk]

Next, let's see if we could use one of Munira's strategies to improve one of our own existing ways of earning money. Working in pairs, please talk about one of your current ways of earning money and decide on an example of how you could use one of Munira's three strategies to increase your earnings. Remember that her strategies involve: (i) Adding variety to the product/service she was selling; (ii) Asking her customers about improvements she could make; (iii) Keeping her eyes and ears open for new ideas, and improved methods.

After giving the girls 10 minutes to work in pairs, ask for one or two volunteers to share their business improvement strategies.

THE STORY OF MUNIRA

Munira needed money to help buy food for her family and meet her personal goals, so she started a business of making jewelry from beads and selling it to people in the market. At first business was good, but then more and more young people started to copy Munira (even some of her friends) – and business started to drop.

One thing Munira noticed was that many customers bought matching sandals from another vendor after buying her beads – so she started to sell both jewelry and sandals (giving a special price for people who bought both), and that helped grow her business again.

Next, she started to ask her customers what preferences they had regarding the beads and most of them preferred beads of mixed colors and matching sandals. So Munira started mixing the beads when making the jewelry, and matching them to respective pairs of sandals. This kept most of her customers very loyal to her (and made it easier to sell more too!!)

Finally, Munira paid close attention whenever she travelled to other markets to see if anyone was trying something new when it came to selling beads and sandals. That is where she first found out about a woman selling cheaper raw materials (beads for the jewellery and leather for the sandals). She started buying the raw materials from the woman, hence increasing her profits and at the same time reducing the cost of producing jewellery and sandals. However, she realized that she needed to save and purchase a sack of beads in bulk, as they were always getting more expensive.

activity 3

CONSIDERING NEW WAYS TO EARN MONEY

(20 MINUTES)

Now that we have spoken about ways to improve our existing ways of earning money, let's spend a little bit of time considering new ways to earn money. During today's session (both the game at the start, and the activity we just completed) we have been hearing about lots of different ways girls in our group earn money.

So let's take a few minutes now to use each other as a source of good information and advice about new ways to earn money (that we can add to our existing ways of earning money, or use to replace an existing way). Let me invite some of you to:

- Tell me about a new way of earning money you have heard someone speak about in our group today.
- Now why don't you spend 10 minutes talking to that person to get more information and ideas about just how that way of earning money works. Make sure to talk about what kind of skills and qualities someone needs to succeed at that way of earning money.

Let's keep pairing off this way until everyone has someone to speak with (and then let's take 5 minutes or so to speak). After all of the pairs are done, let's rejoin the larger group for one final reflection:

You see—being part of this group is a great source of ideas and support. And who knows, maybe some of you will now be able to both improve an existing way of earning money and/or to start a new one!!

NOTE TO TRAINER: After this session would be an ideal time to bring in one or two guests who could serve as role models in ways to earn money—perhaps a woman from the community who has been successful in some type of work or enterprise. Have them speak about their experience, how they got started, challenges they've faced, and what is their secret to success. Make sure to organize ahead of time with the visitors and inform the girls that someone special will be coming so that there is good attendance.

8

Girls' Money and the Risky Income Cycle

OBJECTIVES

By the end of this session, participants will have:

- Explored how adolescent girls in their community make and spend money.
- Discussed the risks and risk reduction strategies of girls' income cycle.
- Updated their own personal budgets.

MATERIALS

- Flipchart paper
- Markers
- Cards

TIME 40 MINUTES

ACTIVITIES

1. Girls' money in and money out—25 minutes
2. Understanding cash flow—15 minutes

activity 1

GIRLS MONEY IN AND MONEY OUT

(25 MINUTES)

Put a blank piece of flipchart paper on the wall or in the center of the room.

Explain:

☞ Last session we thought about how adults in our community make money. Now we're going to think more about girls like yourselves.

Ask:

☞ **Can I have a volunteer to draw a picture of a typical girl in this community?**

As the volunteer finishes her drawing, ask for the girls in the group to pick a name for the girl in the drawing.

Hand out cards or pieces of paper, at least three for each girl.

Say:

☞ On each of these cards, I want you to write one way that [*name of girl*] gets money. Once you're done, come and paste your cards (or put them down if the flipchart is on the floor) on the left side of [*name of girl*].

Once everyone is finished, hand out another set of cards (at least three, if possible in a different color) to each girl.

Say:

☞ On each of these cards, I want you to write one thing that [*name of girl*] spends money on. Once you're done, come and paste your cards (or put them down if the flipchart is on the floor) on the right side of [*name of girl*].

Invite the girls to gather around the picture of [*name of girl*]. Start with the right side. Have the girls help you organize the cards into piles of common expenses (i.e., clothes, food, sanitary towels, school fees, school supplies, rent, etc.).

Say:

☞ Move the expenses around and put the most common expenses on top, followed by somewhat common, and then on the bottom the least common expenses.

Once the girls have agreed on the order of expenses from most common to least common, ask for volunteers to explain a bit more about each expense, including:

- **About how much does [*name of girl*] spend in a week on this expense?**
- **In a month?**
- **Why does she spend money on this particular item?**

Once the conversation about the expenses has concluded, have the girls repeat the process with the sources of money—starting by grouping according to similar sources of cash (i.e., pocket money from parents, boyfriends, casual chores, etc.), and then have them rank the sources of income by most common to least common.

When the girls have agreed on an order,

Ask:

☞ **About how much does a girl get from this source of money in a month?**

How often does she get this income—Daily? Weekly? Monthly?

Can someone describe more about each of these sources of money?

activity 2

UNDERSTANDING CASH FLOW

(15 MINUTES)

NOTE TO TRAINER: Ask the girls to recap (list) different sources of income.

Ask:

In our previous discussions, we talked about different places that a girl like *[name of girl]* would possibly get her money from. Do you think it matters where this money comes from?

From the different ways that *[name of girl]* gets money, which are some that might have some risks to them?

Explain:

“Risky” means anything that gets you into trouble with your parents, teachers and any other person in authority.

For each of the risky sources of income mentioned,

Ask:

What makes this way of getting money risky?

What can *[name of girl]* do to avoid some of these risks?

Some examples of risky sources of income may be:

- if you have borrowed money from a friend and you can’t repay in good time.
- stealing money from your parents, friends or classmates.
- not returning change from the shop/market when your parents send you.

Ask:

If *[name of girl]* had her own money that she kept aside as savings at her home, how would this change the risk that comes with some of the ways of getting money that we discussed?

Encourage discussion and then

Explain:

When you are in this situation or feeling like you “owe” someone something for the money that you borrowed, you live in fear and are uncomfortable until you are able to repay that money.

Therefore, we can try to think about our savings as a way that we can use our own money so that we do not have to rely on borrowed money to meet our needs.

Ask:

Does anyone have a story or an example of when something like this happened? Let’s remember to keep confidentiality and not use anyone’s names.

Let a few girls share examples. This may open up a larger conversation. You will have to decide if you want to keep going with the session or let the girls talk more about this topic.

9

Know the Difference Between Needs and Wants

OBJECTIVES

By the end of this session, participants will have:

- Distinguished between needs and wants.
- Described Abida and Latifa's needs and wants.

MATERIALS

- The Story of Abida and Latifa

TIME 30 MINUTES

ACTIVITIES

1. Identify needs and wants—10 minutes
2. Listen to the story of Abida and Latifa—20 minutes

activity 1

IDENTIFY NEEDS AND WANTS

(10 MINUTES)

Begin the session with a short game:

We are going to write the letters of two words with our bodies. Ready? Follow me!

Show the girls how to write the word “needs” with their head. Tell them to move their head in the air to “write” the letters the way they would move a pen on a piece of paper. After, show the girls how to write the word “wants” with their knees. Have fun making the letters and acting silly!

Explain:

We spend money on many things. Some of these things are necessary for our survival. These things are called NEEDS. Others are things that we want, and when we buy them, we are happy. We call these things WANTS. Today, we are going to discuss the difference between the things that we want and the things that we need. One part of controlling what we spend is knowing the difference between needs and wants.

I want you to imagine a line now between *this side of the room* and *that side of the room*. One end of the line represents our NEEDS. The other end represents our WANTS.

Choose two places in your room or area to represent “wants” and “needs” so that girls can form a line between the two places. If you are outside, pick two objects. Alternatively, you could ask two girls to represent needs and wants and stand in two different spots.

I'm going to say an expense, something that we could spend money on. Your job is to decide if this expense is a WANT or NEED.

I am not going to wait for everyone to agree. If you think that the expense is only a need, place yourself close to the object [or person] that represents NEEDS. If you think that the expense is only a want and can never be considered as a need, place yourself close to the object [or person] that represents WANTS. But if you are not sure, or you think that in some cases, the expense could be either a want or a need, place yourself somewhere in the middle of the two objects [or people].

For example, if I say “bangles,” and you think that it is more of a want than a need, you can stand here.

Demonstrate by standing closer to the object or person that represents “WANTS.”

However, if I say “medicine,” and you think that medicine is definitely a need, stand here.

Demonstrate by standing closer to the object of the person that represents “NEEDS.”

When you are sure everyone understands the game, read the following expenses, one at a time. After each expense, give the girls time to place themselves along the line of wants/needs.

1. Water	5. Food
2. A second pair of shoes	6. Rent
3. Hijab	7. Money to start a business
4. Bus fare	8. Sweets

After the girls have chosen their place along the line, ask one or two of them in different spots to explain why they chose to stand where they did.

NOTE TO TRAINER: For the game above, make sure to keep the group moving. If you stop to discuss each statement, the time needed for the activity will increase greatly. Keep the group moving to keep the energy of the game!

When you have finished all 8 items above,

Ask:

Are needs and wants the same for everyone?

After 2–3 girls have had a chance to answer,

Say:

Needs and wants are often different for different people. But to manage our money well, we have to decide what needs and wants are for us. The key to saving is making good decisions about spending our money. If you can spend less money and save even just a little bit, you will attain your savings goals in the end. Your short-term loss can become your long-term gain.

activity 2

LISTEN TO THE STORY OF ABIDA AND LATIFA

(20 MINUTES)

The objective of the story of Abida and Latifa is to help girls understand the difference between needs and wants with an example. If you have time and resources, make handouts of the story for girls to follow along with and take home to read later.

Read the story of Abida and Latifa.

Ask girls the following questions to make sure that everyone understands the story:

How does Abida manage her money?

[She spends it all, mostly on things that she wants like lotion and perfume.]

How does Latifa manage her money?

[She saves some of her money, and she has cut down on her spending, too. She spends mostly on needs—she gives some to her mother for household expenses, and spends a small amount on herself.]

Are you more like Abida or Latifa? Why?

Say:

Next time, we will keep talking about the Eight Steps for Savings. Until then, pay close attention to what you spend money on!

THE STORY OF ABIDA AND LATIFA

Abida and Latifa work together to assist their elderly uncle to fetch water for the cattle. In return the uncle gives them each Ksh. 20 per week for the good work. The girls are able to earn at least Ksh. 60 per month.

Abida spends all of her money each month buying new clothes whenever she accompanies her mother to the market. Sometimes she helps her friends when they need money, Abida also buys perfume and body lotions whenever she has some money in her pocket, and she never saves any money.

Latifa saves Ksh. 50 each month. It has not been easy, but she has cut down on spending money a lot. Instead of buying perfume and lotion, she decided to continue using the small Vaseline her mother buys her once in a while. She has also decided to wait a few months before buying a new pair of shoes. Even though she still gives some money to her mother for household needs, she has found that it is possible for her to save a little money by differentiating her wants from needs.

10 Control Spending

OBJECTIVES

By the end of this session, participants will have:

- Understood the idea of making spending priorities.
- Practiced making a personal budget.

MATERIALS

- Spending Game
- Budget

TIME 40 MINUTES

ACTIVITIES

1. Make spending decisions—20 minutes
2. Introduce the budget—20 minutes

activity 1

MAKE SPENDING DECISIONS

(20 MINUTES)

Ask the girls to sit in a circle or gather around so that everyone can see. Give each girl 10 stones (or sticks or pieces of paper) and tell them that each one represents 10 Shillings—so take care of them!

Explain:

We are going to play a game called the Spending Game. In this game you are going to have a series of opportunities to spend the 100 Shillings I have just given you (which you can imagine that you earned doing some small jobs for me). Each of you will make your own choices—and there is no right or wrong way to spend your money.

- What questions do you have?

Next say:

I want all of you to imagine that it is Saturday and you have decided to go to the market to buy a new outfit. You each have 100 Shillings that you earned from fetching water for a neighbor—and you will now have a series of opportunities to spend it.

****As the girls spend money, make a note of what each one buys from you.****

1. It is hot and your feet are tired. A lorry driver asks if you want a ride to and from the market today—it just costs 10 Shillings. **Pay me 10 Shillings** if you accept his offer and then take a quick drive to the market (or just keep walking on your tired feet).
2. You arrive at the market (in the lorry or by foot) and you see that some of your friends are already there. Your best friend asks if you have enough money to buy you and her something to eat. **Pay me 10 Shillings** if you decide to buy you and your friend some lunch (or just tell her that you are not hungry and keep moving).
3. While you are heading toward your favorite shop a new shop catches your eye. It has some very attractive dresses for sale—and matching sandals. The price is only 80 Shillings but the owner says you have to decide right away as he only has a few outfits available. **Pay me 80 Shillings** to buy the dress and sandals from him or move on (and only let the first three girls buy from him as his supply is limited).
4. Next you go to your favorite shop where the owner knows you and gives you good prices. She has some very nice dresses for 50 Shillings—and a good supply. **Pay me 50 Shillings** to buy a dress.
5. Now you are looking for shoes—but it is hard to find ones that match your new dress. You go to another store and the perfect shoes cost 40 Shillings. **Pay me 40 Shillings** to buy shoes—or move on.
6. You remember that you have run out of soap and lotion at home and you see a very good price to buy one of each for just 10 Shillings. **Pay me 10 Shillings** or miss out on this good price.
7. You are feeling unlucky when it comes to buying a new outfit when suddenly you see that there is a new trader in the market in Garissa who has very special prices—you can buy a dress, shoes, and a necklace for 70 Shillings. **Pay me 70 Shillings** to buy them.
8. You are getting ready to go home when you see that your Auntie is in the market. She asks if she can borrow 10 Shillings from you to buy some medicine as she is not feeling well. **Pay me 10 Shillings** if you lend the money to her.
9. On your way to leave the market you see a woman beside a broken down lorry selling dresses for 30 Shillings and shoes for only 20 Shillings (a special price because she needs to raise money to fix her lorry immediately). **Pay me 30 Shillings** to buy a dress and **20 Shillings** to buy shoes at this very special price
10. Now it is time to go home. If you paid for a ride with the taxi driver then go home with him. If not, then enjoy the walk home...

Thank the girls for playing the game.

activity 2

INTRODUCE THE BUDGET
(20 MINUTES)

Ask girls to reflect on what they spent their money on during the first round of the Spending Game before.

- **What did you end up spending your money on? And did you save any?**
- **How did you make your decisions?**
- **Are you happy with how you spent your money?**

Say:
Now that you have thought about your spending decisions, it is time to learn about something called a “budget.” A budget is a tool to help you plan for the money that you earn and the money that you spend. We can use it to plan both our “money coming in” and our “money going out” over a period of time. It can help us to spend our money wisely, and to save more money that we might without it.

A budget is simply our planned “money coming in” and how we will spend that money over a period of time—like a week or a month.

If flipchart paper is available, prepare a budget as a sample and post it so everyone can see, or make a photocopy of the budget for each girl. If there is no flipchart paper, show girls the budget on this page. Explain the different sections of the budget.

Say:
Now let’s work with another group member to plan for Round Two of the Spending Game. We will all start out with the same amount of money (100 Shillings) which we can put in our “money in” row and we will have the same choices to make. But this time we have a chance to plan ahead and make a budget.

So take a few minutes to “budget” how you will use your 100 Shillings. Then we will quickly go through the same steps for the game.

Repeat all the same steps (buying choices) as in Round one.

Now de-brief the game.

- Ask:*
- **What did you end up spending your money on? And did you save any?**
 - **How did you make your decisions this time? Were they different or the same?**
 - **Are you happier with how you spent your money this time? Why?**

MONEY IN	
	Ksh. 100
MONEY OUT	
Transport	
Food	
Clothing	
Soap/lotion	

(activity 2 continued on next page)

activity 2 (continued)

Now introduce a more general budget template. If flipchart paper is available, prepare a budget like the one on the right as a sample and post it so everyone can see, or make a photocopy of the budget for each girl. If there is no flipchart paper, show girls the budget on the following page. Explain the different sections of the budget.

This next budget is an example of one we could all use to track our actual money in and money out over a typical week. It uses the same overall design as the one we just used in our game, but it is closer to what we might use in real life to apply our new budget making skills.

Tell the girls to try to make a budget for the coming week.

Say:

Think about what “money in” you will have next week. That is money that you get from different sources. Then think about what you will spend next week.

Give the girls 10 minutes to work on a personal budget.

Then say:

Good job. A budget is something that you can use to plan, and can be updating as your money in and money out change; that is, if you get money from new or different sources, or spend it on different things, or in different amounts. Practice at home as making a budget and sticking to it take practice!

Remember, if you don't have enough money in, you may have to reduce what you spend. If you have more money coming in than what you will spend, you can always save!

Don't worry if this seems hard. Just start by writing down what you spend. That is the first step to having a good budget.

Before we leave, I want to give you two rules for savings. Repeat after me:

- Spend less than you earn!
- Save a little every week!

If you follow these simple rules, your savings are sure to grow.

Thank the girls for their work.

BUDGET TEMPLATE

		What I earned/ spent last week	What I plan to earn/ spend next week
MONEY IN (Income)			
1. Salary
2. Gifts or Allowances
TOTAL			
MONEY OUT (Expenses)			
1. Food
2. Clothes
3. Utensils

Think About the Future: Money In and Money Out

OBJECTIVES

By the end of this session, participants will have:

- Reported the ways in which a girl (Naima) plans ahead for her income and expenses.
- Described the behavior of someone who does not plan ahead.

MATERIALS

- Naima's Story

TIME 30 MINUTES

ACTIVITIES

1. Listen to Naima's story
—10 minutes
2. Talk about planning ahead—20 minutes

activity 1

LISTEN TO NAIMA'S STORY

(10 MINUTES)

Explain that the “Savings Step of the Day” is: “Think About the Future: Money In and Money Out!” Tell girls that another way to say “money coming in” is “in-come,” and another way to say “money going out” is expenses.

Tell the story on the following page about Naima.

When you have told the story,

Ask:

How does Naima earn money?

[Helping her aunt.]

How does she manage the money she earns (her money coming in or “income”)?

[Thinks about her expenses for the week first, saves in her home bank for weeks with no income or unexpected expenses.]

How does planning ahead help Naima?

[She can meet her needs, and save for some of her wants—the hijab.]

NAIMA'S STORY

Naima is a 14-year-old girl who works hard at her studies and helps her family, but she also really enjoys fashion. She has been dreaming of getting a new hijab, but she knows that she can't ask her parents to get one for her. In addition to going to school, Naima usually works one or two days a week helping her aunt to fetch water from the government borehole that is quite a distance from their home. Her auntie gives her at least 20 Shillings a day. Each week, Naima thinks about what she needs to spend the money on to help her family, like food, paraffin for the lamp, and charcoal, as well as some personal needs like Vaseline.

But, sometimes, she will keep a little extra in her home bank just in case she fails to get work in the coming week, or some other need for money comes up—as it usually does! However, every once in a while, Naima finds herself with a small amount of extra pocket money and then she puts it aside to save up and buy a hijab.

activity 2

TALK ABOUT PLANNING AHEAD

(20 MINUTES)

Divide girls into groups of three or four.

Explain:

You have heard the story of Naima. She thinks ahead about what she needs to buy and sets aside her money for those needs. Your job is to work together and create a very short story about a girl (or girls) who are NOT like Naima. That is, the girls in your story should do the opposite of Naima. The girls in your story will NOT know how much they earn and NOT plan ahead for the things they need to buy.

While you can think about things you know in real life, please don't use anyone's real name or situation in your story. Come up with a fake name to protect the person who didn't plan! You have five minutes to come up with a story together.

Circulate while the girls are planning to make sure that everyone understands the task and to keep them on track. After five minutes, ask a volunteer from each group to tell her story. Clap for each group!

If time allows,

Ask:

Have you seen any girls in your community who are more like Naima or other girls in these stories?

What are some specific things that make them more like Naima or other girls in these stories?

What can they do to be more like Naima and plan ahead?

[Use their budget, think about their expenses before they make them, spend less than they earn, save money with their group, save money at home.]

NOTE TO TRAINER: If your group of girls enjoys dramas and role plays, you could replace Step 2 above with a more “dramatic” activity. Put girls in groups of three or fours and ask them to create a short skit that shows a girl or girls who do the opposite of Naima—that is, they do NOT plan ahead. Girls can prepare the skits together at home, and present them the next time you come together.

12 Save Regularly!

OBJECTIVES

By the end of this session, participants will have:

- Determined whether statements about saving are true or false.
- Evaluated the savings behavior of two cousins.

MATERIALS

- Story: Two Cousins Save

TIME 30 MINUTES

ACTIVITIES

1. True or false?—15 minutes
2. Two cousins save—a story—15 minutes

activity 1

TRUE OR FALSE?

(15 MINUTES)

Introduce the Savings Step of the Day: “Save Regularly!”

Pick two girls or ask for two volunteers to stand in two places at the front of the room. Tell everyone that one girl represents “True” while the other represents “False.”

Explain:

We are going to play a game where you will have to stand up and go behind one of these girls. This time, I will give you a series of statements about saving.

For each statement, you must decide if you think it is true or false. If you think the statement is true (point to the girl representing “True”) stand behind your friend here. If you think it is false (point to the girl representing “False”) stand behind your friend here. If you are not sure, make your best guess.

Let’s do an example to make sure everyone understands. I will give you a statement. Think about the statement for just a moment, and then move to the place along the line that shows your answer.

“Saving money can help you in the future”

When everyone has chosen a place, ask two girls—one from the “true” side, one from the “false” side—to explain why they chose that spot. Explain that the statement is “false”, because it depends on the individual’s needs. Then, continue with the activity.

Ask:

What questions do you have?

Choose 4-5 of the statements in the box on the right to read. (**NOTE:** During the activity, if you find that the discussions are taking a lot of time, cut down on the number of statements.)

After each statement, instruct the girls to move to a place along the line that shows how they think about the statement. Ask a few girls in different places along the line to explain their choice. Then read the next statement.

Explain:

Saving is hard to do when there is not enough money to pay for all the things we need. However, saving can be easier when you decide to save regularly. Even if you can only save a little bit on a regular basis, making saving a habit will slowly build up a sum of money and help you reach your goals.

Agree/Disagree Statements

- You have to have a large sum of money to save. [**False**—*you can save even small amounts of money.*]
- Saving every week requires discipline. [**True.**]
- Saving tiny amounts of money is a waste of time. [**False**—*even small amounts add up with time.*]
- You should only save the money you have left over at the end of the week or month. [**False**—*it is best to save before you spend.*]
- Saving a little bit of money each week will eventually result in a larger amount of money you can use for something important to you. [**True.**]
- Girls like me do not have enough money to save. [**False**—*most girls have at least a small amount they can put aside to save.*]
- Girls should not have to save money; their parents should save for them. [**False**—*everyone has emergencies and future needs, so girls should save too.*]

activity 2

TWO COUSINS SAVE—A STORY

(15 MINUTES)

Read the story on the right (“Two Cousins Save”). Discuss the story, using the following questions to make sure the girls understood the story:

• **What happened to the girls’ savings plan?**

[They weren’t able to follow it when Aisha found other things to spend the money on.]

• **Why is Aisha having a hard time saving every week?**

[She wants to go to variety shows, she had to help her sick mother one week.]

• **What do you think about Aisha’s plan to collect a larger amount of money later?**

[It might not work because she might find it difficult to save a larger amount of money that she did not plan for, and then the girls’ plans will fail. She might also think about changing the spending decisions she has easy control over like going to a variety show.]

• **What are the girls’ chances of starting their business making necklaces?**

[They are probably not good based on what has happened with Aisha.]

Conclude by asking:

How would things work out differently for Aisha and Baysan if they were members of a savings group or had a home bank?

[The group encourages discipline to save regularly.]

TWO COUSINS SAVE

Aisha and Baysan are cousins who live next door to each other. They decide that they can make some money making and selling necklaces. In order to buy the the initial materials needed to make the necklaces, the two girls make a promise to start saving. They know exactly what they want to buy and the prices of each item. They decide to save weekly and together agree that when they have 1000 Shillings in total they will be able to start their business.

Baysan is good at math, and the cousins promise to each save 50 Shillings every week. So, they will save a total of 100 Shillings each week. That means that they need to save for 10 weeks before they can start the business. It seems like a long time, but by putting their savings together, it will make it easier for them to realize their goal.

For the first few weeks, both cousins make sacrifices in order to save, and their family congratulates them! But, Aisha becomes tempted and buys a new piece of jewelry. Then, she also uses some of her money to take transportation to the nearby shops instead of walking.

The next week, when Baysan asks Aisha for her savings, Aisha just shrugs and says she can’t afford to save right now. She promises to give Baysan a bigger sum of money later, after she has more savings. “Don’t worry,” she says, “I’ll work hard and save a lot next month. It will all work out the same.”

13 Dealing with Setbacks in Saving

OBJECTIVES

By the end of this session, participants will have:

- Explored the challenges and possible setbacks expected in saving.
- Understood difficulties encountered when plans don't go as planned.
- Understood how to plan and deal with setbacks in saving.

MATERIALS

- The Story of Halima

TIME 40 MINUTES

ACTIVITIES

1. Review the savings plan—5 minutes
2. Explore challenges and possible setbacks in saving—10 minutes
3. The “Fallback plan”: Simple steps for dealing with setbacks in saving—25 minutes

activity 1

REVIEW THE SAVINGS PLAN

(5 MINUTES)

Ask:

An idea about how you are going to accomplish your savings goals and the action you will take to achieve those goals is called what?

[A savings plan.]

**What is an example of a savings plan?
List the actions you are going to take to achieve your savings goal.**

Listen to examples from the girls in the group, congratulate them on their hard work and encourage them not to give up.

activity 2

EXPLORE CHALLENGES AND POSSIBLE SETBACKS IN SAVING

(10 MINUTES)

Say:

Saving is not always as easy as it seems and sometimes things may not go as planned. In the previous sessions, we talked about making a savings plan which helps us achieve our saving goals. When we make our savings plan, we must always be aware of the challenges and possible setbacks to our savings plan.

Ask:

What is a setback?

[A setback is an event or a happening that prevents your plan from working out. This is likely to affect your plan.]

What are some of the examples that may be a setback to a savings plan?

[Some examples:

- *Asmat plans to save 10 Shillings per week from her school pocket money, but suddenly, the school undergoes an indefinite closure due to a measles outbreak in the school community, and 'no school' means no 'pocket money.'*

- *Fazia, who lives with her mother and three younger siblings, has been saving 15 Shillings each week so that she can afford a new hijab for Id Ul Fitr. However, her mother's goats were stolen, and she needs to help her buy at least one goat.]*

activity 3

THE “FALLBACK PLAN”: DEALING WITH SETBACKS IN SAVING

(25 MINUTES)

Explain:

We are going to listen to and discuss a story of a girl who had a good savings plan but things did not work out as she expected. But most importantly, we are going to discuss how she learned to deal with setbacks to her savings plan.

Read out loud the story of Halima (found on the next page).

Ask:

What were Halima’s saving goals?

[To raise money to start a henna business.]

What was Halima’s savings plan?

[She planned to raise 200 Shillings by doing chores, then use the money to start a henna business.]

What were the setbacks in Halima’s savings plan?

[Her sister fell sick; her friends also started applying henna and her business went down.]

How did Halima overcome her various setbacks?

- [• Difficulties in raising capital—readjusted her timeframe for the savings goal because she was not able to save as much each week as she had initially planned.*
- After using her savings for an emergency she began saving all over again.*
- She came up with an additional way of making money for her capital.*
- Overall—SHE KEPT SAVING AND DIDN'T GIVE UP!]*

Say:

One thing that will help in dealing with setbacks in savings is having a “fallback plan.” This plan involves five simple steps that will help you manage a setback in your saving:

1. Revisit your savings plan.
2. Explore and list your available options.
3. Weigh your options and compare them to your savings goal.
4. Choose your fallback plan.
5. Continue saving and don’t give up!

THE STORY OF HALIMA

Halima is a 14-year-old girl in class 7 living with her elder sister in Wajir. She would like to save enough money so that she can start a small henna applying business. She will use some of her income for her school items because she can't always depend on her sister to provide them. She knows that she will need to earn some money so that she can buy the initial items she needs.

Halima washes her neighbor's clothes and fetches water to earn at least 20 Shillings per week. She manages to save 200 Shillings in six weeks. Just before Halima sets off to buy henna for her business, her sister falls ill and she has to use the 200 Shillings for medicine.

But Halima does not give up. She begins saving for her capital again and manages again, even though this time it takes even longer (nine weeks). She finally manages and buys a small container of henna that she can use on customers during her cousins wedding. She makes good money and is able to buy more henna and keep her business going. However, a few of her friends also decide to start a henna applying business, so she starts getting fewer and fewer customers.

To keep her business alive so she can keep saving, Halima decides to re-invest some of the money she made applying henna at the wedding into selling small bead bracelets that women buy after they've had henna applied, and is able to make enough money not only to help her buy school items, but also buy more henna and bracelets to keep the business going.

14 Your Own Money vs. Someone Else's Money

OBJECTIVES

By the end of this session, participants will have:

- Differentiated between one's own money and borrowed money.
- Identified characteristics of borrowed money.
- Understood the importance of being in control of one's own money.

MATERIALS

None

TIME 40 MINUTES

ACTIVITIES

1. Distinguish between borrowed money and your own money—10 minutes
2. Understanding the responsibilities of borrowing—20 minutes
3. Understanding the importance of gaining control over your own money—10 minutes

activity 1

DISTINGUISH BETWEEN BORROWED MONEY AND YOUR OWN MONEY
(10 MINUTES)

NOTE TO TRAINER: For the game below, make sure to keep the group moving. If you stop to discuss each statement, the time needed for the activity will increase greatly. Keep the group moving to keep the energy of the game!

Explain:

We have spent a lot of time learning about why it is important to save and how to increase our savings. But sometimes we also borrow money. In the next few meetings, we will try to understand the difference between money we save and money we borrow.

Let's start by making a line. Stand up!

Show the girls where you want them to stand to form a line.

Say:

I am going to tell you different amounts of money and where they came from.

For each one, you must decide if that money is borrowed or if it is your own money. If you think it is borrowed, step to the left. If you think it is your own money, step to the right.

When there is disagreement, discuss the different opinions and clear up any confusion about borrowed money and money that belongs to someone. Read the following descriptions:

- You are given money to buy clothes and you save 20 shillings [own]
- Your sister lends you 50 Shillings to buy body lotion [borrowed]
- You sell your jewelry for 60 Shillings to a friend [own]
- You wash your neighbor's clothes for 20 Shillings [own]

- At the market milk costs 50 Shillings per litre and you buy it on credit [borrowed]
- You borrow 10 Shillings to buy a lost exercise book [borrowed]
- Your aunt gives you a gift of 20 Shillings [own]
- You take 200 Shillings from your home bank locked up in your suitcase to buy sanitary pads [own]

activity 2

UNDERSTANDING THE RESPONSIBILITIES OF BORROWING

(20 MINUTES)

Divide the group into two teams and give each team a name. Use something familiar or humorous for the teams: names of animals (“the elephants” vs. “the giraffes”). Refer to the list of “Questions about Borrowing Money” on the next page.

Explain:

I have a list of questions about borrowed money, and we will play a game to talk about the two.

If you have blackboard space, or a blank piece of flipchart paper, write the rules down before you explain them. If you don't, explain the rules clearly and ask one or two girls to repeat them to make sure everyone understands.

Say:

When I read the question, both teams will have one minute to discuss the answer.

The team whose “turn” it is will have the first chance to answer.

- If they are right, we will move on to a new question for the other team.
- If they are wrong, the other team will have a chance to answer before their turn.

We will start with Team 1. Ready?

Congratulate both teams! Explain that the point of the game is to understand that money comes with responsibility—paying it back, paying it back on time, and paying it back with any interest that might be charged.

Conclude by asking:

What are some advantages of borrowing money?

[Some possible answers include: you have immediate access to money; you can buy what you want right away; you will not miss the chance to buy something or make an investment at a good price.]

What are some disadvantages?

[Some possible answers include: borrowing costs money because of interest and/or fees; if you fail to repay there are consequences; there is pressure to repay on time; if there is an emergency you may never be able to repay.]

What questions do you have about borrowing money?

QUESTIONS ABOUT BORROWING MONEY

- **Why is borrowed money different from your own money?**

[Borrowed money must be paid back; you have more flexibility and control with your own money.]

- **When you borrow money, why do you have to pay it back?**

[Because the money does not belong to you; the money belongs to the person or institution who lent it to you, who expects to get it back.]

- **If you borrow money from a friend, do you have to repay it?**

[Normally, yes. Sometimes a family member or friend will end up giving you the money—that is, giving you permission to not repay the loan. But you should never assume that this will happen, and always plan to repay or return whatever you borrow!]

- **When you borrow money from a friend, can you decide when to pay it back?**

[Maybe. If you borrow from a friend or relative, they may be very flexible about when you need to return the money. You will have to discuss the terms and schedule before you borrow the money.]

- **When you borrow money from a financial institution (like a bank) or a savings group, can you decide when to pay it back?**

[No. If you borrow from a financial institution or a group, you will most likely have a payment schedule to repay in installments that are due each week or each month until the full amount is repaid.]

- **Does it cost you anything to borrow money from a friend or family member?**

[It depends. When you borrow from a friend or family member, she may not ask you to pay interest on the loan. Again, this is something you will have to discuss before you borrow the money.]

- **Does it cost you anything to borrow money from a financial institution or a savings group?**

[Yes. Most lenders charge you something to use their money (this amount is “interest”).]

- **If you borrow money and a thief then steals it, do you still have to repay the money?**

[Yes!]

activity 3

UNDERSTANDING THE IMPORTANCE OF GAINING CONTROL OVER YOUR OWN MONEY

(10 MINUTES)

Explain:

Now that we have talked about one's own money and other people's money, we are going to look at why it is important to ensure that other people respect your own money and understand that you have the right to make your own decisions over it.

Let's begin by thinking of some of the ways that sometimes make us feel we don't have control over our own money

Use the following questions to prompt girls to think very thoroughly about situations they feel lessen their decisionmaking over their own money. Aim to find out the girls' perceptions of who can have the right to access their money. Use a blackboard or flipchart to list the girls' ideas as they offer them.

Read:

Firdaus has 250 Shillings and plans to buy a watch when she visits her sister in Garissa. Instead, her mother gets the money from her home bank which she had hidden in a cupboard in her room and gives it to a visiting aunt to go to hospital for treatment.

Ask:

How can she make her mother understand that she needed to discuss with her first before giving the money to someone else and without her permission?

Read:

Rehema keeps her savings in her home bank and often deposits small amounts of money whenever she has. She hopes to raise some money so she can save up for capital to start a new business in the near future after completing primary school. The mother knows she keeps some money in her home bank and instead of saving for her own business, she tells her to save the money for the family to buy a new jiko (charcoal cooker) for boiling rice for sale at the market.

Ask:

How can Rehema make her mother understand that she plans to use the money for something else?

Read:

Mariam and Saida are best friends and spend a lot of time selling tomatoes at the market together. They know a lot about each other and share almost everything. Mariam knows that Khadija, one of their other friends, borrowed 50 Shillings from Saida two weeks ago. Khadija raises the money and decides to return it to Saida but finds Mariam instead. She gives the money to her knowing that they are best friends but insists that she give it to Saida upon her return. Mariam decides to use the money without Saida's permission.

Ask:

How does Saida make Mariam understand that though they are best friends, she had no right to use the money without her permission?

Explain:

Many times we may feel like our own money is not really ours because either other people decide on our behalf what we should do with it or simply have access to it without our permission. These can be our friends, our parents, our siblings, or boyfriends who often feel they should have access to our money or make decisions on our behalf. While it is important to help out at home or take on other responsibilities moneywise, it is also important that people around you know and respect the fact that they have the responsibility to discuss your money with you and that you have the right to make the final decision.

Ask:

What can Firdaus, Rehema, and Saida do to change their situation?

[Communicate clearly their saving goals and what they plan to use the money for. In this way, others will gain an appreciation of what the money is intended for.]

[Be open and set limits on other people's access to their money. In this way, others will understand that they don't have the right to access it.]

[Clearly and openly communicate how far they can go in taking up money responsibilities. In this way they won't be raising other people's expectations too high.]

[Show responsibility and assertiveness in the decisions they make over the use of their own money. In this way, others will respect them and set their own limits to accessing their money.]

15 Talking About Money

OBJECTIVES

By the end of this session, participants will have:

- Listed who they talk about money with and what they talk about.
- Described the possible outcomes of discussions about money.

MATERIALS

None

TIME 30 MINUTES

ACTIVITIES

1. The WHO and WHAT of talking about money—15 minutes
2. Possible outcomes when we talk about money—15 minutes

activity 1

THE WHO AND WHAT OF TALKING ABOUT MONEY

(15 MINUTES)

Tell the girls that in this learning session, they will play the game “Stand Up Clap Your Hands.”

Explain that you will start by thinking about WHO we talk to about money. You will give them people or a person, and they should stand up and clap their hands if they talk to that person/people about money. Have fun, and lead this in a lively manner!

Say:

Stand up clap your hands if you talk to:

1. Parents!	6. Your schoolmates!
2. Siblings!	7. Your uncles!
3. Shopkeepers!	8. Your aunts!
4. Your boss!	9. Your neighbors!
5. Your friends!	10. Your grandparents!

Ask other groups if they have other examples of WHO to add. Then, move on to the second part of the game.

Explain that you will now think about WHAT you talk to these people about in terms of money.

Say:

Stand up clap your hands if you talk about:

1. School fees!	5. Bus fare!
2. Pocket money!	6. Prices of products!
3. Things to buy for the family!	7. Saving!
4. Food!	8. Borrowing money!

Give girls a chance to add any other examples of WHAT they talk about.

Tell girls that for the final part of the game, they will think about how they feel when they talk about money.

Say:

Stand up clap your hands if, when you talk about money, you feel:

1. Confident!
2. Happy!
3. Nervous!
4. Angry!
5. Hopeful!

Give 2–3 volunteers the chance to add any examples.

Then, say:

We talk about money with many people in many situations. However, money can be one of the most difficult topics to talk about with other people. Even so, as we saw in the answers to our questions, we still talk about it with many people for many reasons. In the next few sessions, we will learn about some ways to talk about money that make the conversation easier.

activity 2

POSSIBLE OUTCOMES WHEN WE TALK ABOUT MONEY

(15 MINUTES)

NOTE TO TRAINER: In this step, you will introduce girls to three different outcomes that can happen when we talk about money. To liven up the session, you (or girl volunteers) can act out the three scenarios in the outcomes and ask the girls to guess which is which rather than just reading them out loud. Be sure to add time or use another meeting time if you choose that option.

Say:

Our goal together is to find ways to make talking about money easier and more effective. We'll start by identifying the possible outcomes—or results—of talks about money.

Ask:

When we finish talking about money with someone, is everybody involved always happy with the outcome?

Girls will most likely answer “no.”

Say:

When we talk about money, sometimes both people involved end up happy as each gets something they want. Sometimes neither gets anything—both lose. And sometimes, one person gets something she wants and the other person does not. When we talk about money, there are winners and losers.

Explain to the girls that you will give them a few examples. Tell them that their job is to listen and decide who in each story is happy with the outcome.

Possible Outcomes when Talking About Money

Win-Win

This is the best outcome in any discussion about money. Both people (or groups) involved in the discussion get something or everything they want or need. They both have a positive feeling at the end of the discussion, and are willing to talk about money again in the future.

Lose-Lose

This is the worst possible outcome in a discussion about money. In this outcome, the two people (or groups) cannot agree. In the end, neither person (or group) involved in the discussion gets what they wanted. They may not be willing to talk about money again in the future.

Win-Lose / Lose-Win

In a win-lose or lose-win situation, one person (or group) gets what she wants and the other gets nothing. When this happens, the loser might be less likely to want to talk to the winner about money again in the future.

• • • • •

Outcome:

An outcome is the result of something. When we are talking about money, we use outcome to mean the result of the discussion.

Lose-Lose Outcomes

Read/tell Situation 1:

A customer is discussing the price of a blanket with a vendor in the market. They cannot agree on the price, and the customer leaves the market without buying anything from the vendor.

Ask:

Who was the winner at the end of this discussion? [*Neither person.*]

Who was the loser? [*Both people.*]

When someone answers correctly, explain “lose-lose” outcomes:

Say:

Sometimes, no one involved gets what he or she wants. This type of outcome is called “lose-lose.”

Ask:

What is another example of a “lose-lose” outcome when we talk about money?

[*For example: You and your friend from school want to buy bangles and sell them together. However, if you cannot agree on how much each of you will spend, you both lose. Neither of you can make that investment and benefit from it. It is a lose-lose situation.*]

Give 1–2 girls the opportunity to give an example to check their comprehension. Make sure the examples they give are truly “lose-lose” situations, then move on to win-lose / lose-win outcomes.

(activity 2 continued on next page)

activity 2 (continued)

Win-Lose / Lose-Win Outcomes

Read/tell Situation 2:

☞ Minnah wants her sister Zainab to do the house-cleaning for her so that Minnah can spend time with her new boyfriend. Zainab asks Minnah to pay her, but Minnah refuses. When Minnah threatens to hit Zainab, Zainab gives in and agrees to do the house-work for nothing.

Ask:

☞ **Who was the winner in this discussion?** [Minnah]

Who was the loser? [Zainab]

When someone answers correctly, explain “win-lose/lose-win” outcomes:

Say:

☞ Often, one person in the discussion gets what he or she wants, and the other gets nothing. These outcomes are called “win-lose” or “lose-win.” In those situations, the loser might be less willing to talk with the winner about money again!

Ask:

☞ **What is another example of a “win-lose/lose-win” outcome?**

[For example: You need money immediately and cannot wait. You borrow money from a friend, and she will lend you money ONLY if you agree to pay back twice the original amount. In that case, you lose because you do not have time to wait, and your friend wins as she gets a large payback. It is a lose-win situation.]

Give 1-2 girls the opportunity to give an example to check their comprehension. Make sure the examples they give are truly “win-lose/lose-win” situations. Finally, move on to win-win outcomes.

Win-Win Outcomes

Read/tell Situation 3:

☞ Zubaida wants to buy a watch. She discusses the price with a salesman in the market, but she cannot get the price low enough. She is about to leave when the salesman asks Zubaida to wait for a moment, as he has just remembered another watch just added to his stock. Zubaida likes it and it is in her price range. Zubaida decides to buy the second watch.

Ask:

☞ **Who was the winner at the end of this discussion?** [Both.]

When someone answers correctly, explain “win-win” outcomes:

Say:

☞ This outcome is a “win-win” situation. Both sides got something they wanted or needed, if not everything. In win-win outcomes, everyone comes away with positive feelings and they are likely to talk to each other about money again.

Ask:

☞ **What is another example of a “win-win” outcome?**

[For example: You want to buy food from a saleswoman, and you negotiate a good price together. You are happy with your purchase, and your savings, and you recommend that your friends and family buy things from the same saleswoman. She gets more business because of her good offer to you, and you saved some money. You both win, and it is a win-win situation.]

Give 1-2 girls the opportunity to give examples to check their comprehension.

Ask:

- **Which of the three outcomes is the preferred outcome?** [Win-win.]
- **Why?** [Win-win, because both people in the situation win. They both have positive feelings, and are willing to work together again in the future.]

In conclusion, say:

Until we meet again, pay close attention to the discussions that happen around you every day: at home, with friends, in the market. Ask yourself: Are there winners and losers in this discussion? Do both sides end with something they want? Do both seem happy and satisfied? Or, do they seem angry?

Congratulate the girls on a job well done! Remind them that you will ask about outcomes in the next session.

16 The DOs and DON'Ts of Talking About Money

OBJECTIVES

By the end of this session, participants will have:

- Learned the possible outcomes of discussions about money.
- Identified the “dos” and “don'ts” of good communication about money.

MATERIALS

- Sweets for Activity 1 (Optional)

TIME 30 MINUTES

ACTIVITIES

1. Review the possible outcomes of discussions about money—5 minutes
2. Play a communication game—10 minutes
3. Identify the DOs and DON'Ts of good communication—15 minutes

activity 1

REVIEW THE POSSIBLE OUTCOMES OF DISCUSSIONS ABOUT MONEY

(5 MINUTES)

NOTE TO TRAINER: If possible, bring sweets for this activity. Award them to girls for remembering the types of outcomes that are possible when talking about money.

Start by asking:

What types of outcomes are possible when we talk about money?

[Lose-lose, win-lose/lose-win, win-win.]

Instruct the girls to talk in groups of three with the girls sitting next to them. Ask the girls to follow the instructions below.

Say:

In the last session, I asked you to pay attention to “talking about money” in daily life.

Now, take a moment in your groups and describe a discussion you experienced or saw. Also, tell the other girls what type of outcome came from that discussion or talk.

After three minutes, ask for 2–3 short examples to check that girls have remembered the concept correctly.

activity 2

PLAY A COMMUNICATION GAME
(10 MINUTES)

Introduce the topic of communication with a game called “Telephone.” You will play this game in a series of groups. Make sure that each girl gets a chance to participate in one of the groups!

Call six girls to the front to participate in the first round. This will serve as a demonstration for everyone. Tell the girls that together, they are a telephone line. Help girls to form a line.

Explain that you will whisper a short phrase into the first girl’s (Girl 1’s) ear. Girl 1 will then do her best to repeat the phrase to Girl 2. Then, Girl 2 will repeat the phrase to Girl 3, and so on until you reach the end of the line.

Each girl can say the message ONLY once!

The girl at the end of the line will then say what action she thinks she heard. There is no repeating of the message!

For the demonstration, whisper the phrase “Start saving by making a savings goal” into the first girl’s ear. By the end, the message should be confused and different!

When you have finished the demonstration, separate the girls into groups of equal size. Whisper messages into the first girl in each group’s ear. If time allows, you can let the girls come up with their own messages.

Phrases for Telephone

- 1. Always pay yourself first.
- 2. Don’t forget to control your expenses.
- 3. Know the difference between needs and wants.

When you have finished all the phrases,

Ask:

What happened between the beginning and the end of the line?

[The message changed or was completely lost.]

activity 3

IDENTIFY THE **DOs** AND **DON'Ts** OF GOOD COMMUNICATION SKILLS

(15 MINUTES)

Say:

Clear communication is very important when it comes to discussing money and financial topics. We don't want our messages to get jumbled or changed or misunderstood because we don't communicate well—especially when we are talking about money, and we want to achieve a win-win outcome.

Based on your own experiences:

- **What can happen during a conversation about money to cause a win-lose or lose-lose outcome?**

[One person gets angry; one or both people refuse to listen to the other person; one or both is not flexible or willing to see the other person's point of view.]

- **If we want a win-win outcome, what are some rules we should follow when we talk about money?**

Allow several girls to give their opinion. Add any of the DOs below that they do not mention. When you have completed the list, assign each girl one of the following DOs. If you have a blank flipchart or blackboard available, prepare these ahead of time. (There will be more than one girl for each DO.)

DOs for Talking About Money

- Listen to the other person
- Try to see the other person's point of view
- Show respect
- Be flexible
- Clearly state what you want

Then ask:

What should you NOT do when trying to communicate successfully?

Again, allow several girls the opportunity to answer. Add any of the DON'Ts below that they do not mention. When you have completed the list, assign each girl one of the following DON'Ts. If you have a blank flipchart or blackboard available, prepare these ahead of time. (There will be more than one girl for each DON'T.)

DON'Ts for Talking About Money

- Get angry
- Be rude or insulting
- Reject the other person's ideas without listening
- Lock yourself into one position
- Raise your voice

End by practicing the DOs and DON'Ts to make sure everyone remembers them. Allow girls to first repeat the DOs they were assigned, and then the DON'Ts.

NOTE TO TRAINER: If you are using this session and have more time, or if you want your girls to work together outside of their safe spaces group time, you can use this extra activity:

Ask girls to work in five groups. Each group will be assigned one communication DO. They must come up with a song together about that DO. They can use a popular melody and change the words, or write their own brand new song.

Give every group a chance to sing their song when they are finished!

17 Resolving Conflicts About Money

OBJECTIVES

By the end of this session, participants will have:

- Recognized the DOs and DON'Ts of good communication in a real-life experience.
- Identified good communication skills in a sample dialogue.

MATERIALS

- Conversation between a Mother and a Daughter

TIME 30 MINUTES

ACTIVITIES

1. Apply the DOs and DON'Ts to real life—10 minutes
2. Examine a conversation between a mother and a daughter—20 minutes

activity 1

APPLY THE **DOs** AND **DON'Ts** TO REAL LIFE

(10 MINUTES)

Ask girls to repeat the DOs and DON'Ts of talking about money from the last meeting. Because each girl was assigned one to remember, you should easily be able to review them all. Ask for volunteers to make up a gesture that represents each DOs and DON'T of talking about money. Then have everyone call out the DO or DON'T and repeat the gesture. You can show an example for the first one (e.g. place your hand behind your ear for “Listen to the other person.”

DOs for Talking About Money

- Listen to the other person
- Try to see the other person's point of view
- Show respect
- Be flexible
- Clearly state what you want

DON'Ts for Talking About Money

- Get angry
- Be rude or insulting
- Reject the other person's ideas without listening
- Lock yourself into one position
- Raise your voice

Say:

Think about the DOs and DON'Ts, and think of a situation in which you did not communicate well with a parent, teacher or friend.

What could you have done differently in that situation?

Instruct girls to talk with someone sitting next to them for 2–3 minutes. Then, allow 3–4 girls to give their examples and solutions.

Explain:

People often disagree about issues that involve money. Many of you are starting to have more responsibility for yourself and your financial situation at home, at school, or in your work. That means you will probably have more discussions—and even more conflicts—related to money. Today we are going to talk about and practice resolving conflicts about money.

activity 2

EXAMINE A CONVERSATION BETWEEN A MOTHER AND A DAUGHTER

(20 MINUTES)

NOTE TO TRAINER: Ask a girl who can read well (one of the girls in your group or even another volunteer) to do this role play with you BEFORE the group meeting. Spend a few minutes preparing so that the role play goes smoothly. If possible, use a scarf or hat as a costume to show girls that you are playing a different character.

If possible, make photocopies of the role play as a handout for girls and distribute them during the session.

Explain to the girls that they will now watch some of the communication skills from the last meeting in action and present the role play “A Conversation Between a Mother and a Daughter” (see the following page).

At the end of the role play,

Ask:

What is the daughter’s goal for the discussion with her mother?

[To go back to school.]

What is the mother’s reaction to her daughter?

[At first, she is angry. However, with the daughter’s calm explanation, the mother and daughter come to an agreement.]

What communication skills from our DOs and DON’Ts did you notice?

[The daughter showed respect, she didn’t get angry, she understood her mother’s point of view, she was flexible, and she clearly stated what she wanted. She even proposed a new solution when she saw that the first one would not work.]

NOTE TO TRAINER: If time remains, or if your girls work well together outside of the savings group, you can separate them into five groups and assign each group to prepare one of the role plays in Session 18 for next week. (See page 78.)

(activity 2 continued on next page)

activity 2 (continued)

A CONVERSATION BETWEEN A MOTHER AND A DAUGHTER

Daughter: Hello, mother. Can I talk to you about something important? Do you have a few minutes now?

Mother: I have to go out soon to work at the stand in the market. Let's make it quick!

Daughter: Mother, I'm thinking it's time I went back to school. Most of the girls in our safe spaces group meetings have gone back to school after we relocated to this village.

Mother: *(cutting her off)* We have had that conversation before. How much more explaining do I have to do to make you understand that this family is not making enough money for all of you to be in school. It's already hard trying to keep your brothers in school. It just has to wait until there is enough money. Besides you being older, you must be doing something and contribute toward helping the family get around these problems. You know that school costs way more than that.

Daughter: But mother, we have been putting my school on hold for two years now. I'm not getting any younger. All my friends are almost completing school now. Does this mean I'm never going back to school?

Mother: Young lady, you do not seem to realize that there are many things that I need to buy for our household. I have to decide how to spend this money in everyone's best interest.

Daughter: I'm sorry. I didn't mean to make you angry. I know it is difficult to manage so many demands on our budget. I can wait to get back into school. Do you think it would be possible for me to come up with a plan to help you pay for my school fees? I'm saving money now, and I am earning some money helping Mama Musa. It isn't much, but if I save, I can make enough to pay half of my schools fees. If I am able to save that money, would you consider helping me pay for the rest?

Mother: That's a good idea. I suppose I could consider that. But just remember that we may need to cut down on many other expenses that are not priority right now.

18 Role Play Resolving Conflicts

OBJECTIVES

By the end of this session, participants will have:

- Practiced using communication skills to resolve conflicts through role plays.
- Identified more than one solution to sample conflicts.

MATERIALS

- Role-play cards (for literate groups)

TIME 45 MINUTES

(depending on the number of groups who will present)

ACTIVITIES

1. Role play a conflict and find a solution—45 minutes

activity 1

ROLE PLAY A CONFLICT AND FIND A SOLUTION

(45 MINUTES)

NOTE TO TRAINER: If you already assigned these role plays in the previous meeting with girls, or if you are leading a longer meeting, you can go ahead and get started with role play presentation immediately and skip the introduction below.

If you are doing these role plays in one session, you must be very careful to limit the preparation and presentation time so that you have enough time for everyone to present!

Divide girls into groups of five. (There are three role plays. If you have more than 15 girls, you can give the same role play instructions to more than one group.) You can photocopy role plays in advance and give them to the girls, or show/explain the instructions on the following page.

Explain:

I will assign each group a role play that describes a conflict about money. First, each group should decide together on a win-win solution that will solve your conflict. Then you will make up a role play between the people described and the solution you have chosen. At least one of the characters in the role play should try to demonstrate good communication skills.

You have only five minutes to prepare a three-minute role play. Good luck!

NOTE TO TRAINER: Examples of win-win situations are provided for you on the following page so that you can help girls if they are having trouble deciding what a win-win situation could be for their role play.

After each presenting group has performed its role play,

Ask:

What communication skills did you notice among the actors in the role play?

What was the solution they arrived at?

What are other possible solutions to this conflict?

Say:

Today we have seen different ways of resolving conflicts. In real life, not all discussions about money result in a win-win outcome. Although we all hope for a win-win outcome, sometimes these are impossible due to the personalities involved, or the emotions of the moment. However, communicating with confidence is the starting point for achieving good outcomes when talking about money.

As we said in our DOs and DON'Ts, if we explain what we want clearly and listen to the other party's needs, keep calm, and look for a compromise, we can negotiate our way to a win-win outcome more often than not.

(activity 1 continued on next page)

activity 1 (continued)

CONFLICTS ABOUT MONEY: ROLE PLAYS

1. Ebla helps her grandmother on Saturday morning to feed the cattle and she gets a few small coins in return. She wants to save this money herself. But her mother insists that Ebla give her all of the money to help with household expenses.

[Ebla can discuss the reasons that she is saving money with her mother, and they can agree that keeps half of the money, and gives the other half to her mother.]

2. Fatima gets money each week from her auntie when she fetches for her water early in the morning before school, and saves in her home bank. When her parents learned that Fatima had a little to save at the end of each week, they requested her to be buying some household items.

[Fatima can invite her mentor with her savings program to talk with her parents about the benefits of saving. She can present to them the advantages of saving, and the goals that she has set out for savings. She must make sure to explain that this will save her parents money in the long-term.]

3. Shamim recently worked for a neighbor for five days. However, when she went to collect her earnings, the neighbor said she had only worked for four days. Shamim wants to resolve the situation and still collect her earnings.

[Shamim can find someone else who saw her working on each of the five days to back up her story. She can tell the neighbor that she is a good worker, and that she wants to continue to do good work for her and that in order to work well, she must be paid.]

19 Our Journey to Good Money Management

OBJECTIVES

By the end of this session, participants will have:

- Reflected on dreams for the future.
- Revisited key topics from the FE curriculum.
- Celebrated the completion of the FE course.

MATERIALS

- Ball of string

TIME 45 MINUTES

ACTIVITIES

1. Dream big—Reflecting back—10 minutes
2. Revisit key topics from the FE curriculum—20 minutes
3. Let's celebrate our achievement—15 minutes

activity 1

DREAM BIG—REFLECTING BACK

(10 MINUTES)

NOTE TO TRAINER: If you have a blackboard or blank flipchart paper available, use them for this session.

Start by explaining:

At the beginning of our financial education sessions, we spent some time exploring our dreams and looking to the future. We shared our dreams for the future including:

- Where we would be living
- What we would be doing
- What goals we would have reached
- We also talked about dreams we wanted to achieve in five years.

Say:

I want you to think about your dreams again. Now close your eyes for just a moment and think about yourself five years from now.

- Are your dreams the same as before?
- Has anything changed about your dreams now? If so, what has changed and why?

Make sure that all girls have at least reflected on their dreams then ask 3–4 volunteers to share responses to the above questions.

Ask:

What about your savings goals? Have you had to change your savings goals? Has anyone reached their initial savings goal and set a new one?

Have girls share in groups of two or three and then ask if there are 3–4 volunteers that want to share about their evolving financial goals. Be sure to congratulate girls who have met their goals and encourage the girls who are still working on reaching their goals. Reassure them that saving is hard, but if they persist they will reach their goals in the end.

activity 2

RE-VISIT KEY TOPICS FROM THE FE CURRICULUM

(20 MINUTES)

Over the past months we have been meeting together regularly to try and help each other develop some of the knowledge, skills, and attitudes we need to achieve some of our dreams. We have been exploring ways to make wise decisions about earning, spending, and saving money—all as a way to help us to achieve our dreams.

Now that we are at the end of our course, I wanted us to think about a little spider who spends her days dreaming about capturing and eating flies. Sometimes it must seem impossible for her to do. But what does she do to catch them? Have a few girls answer, until one speaks about making a web. Then ask:

And how does a spider make her web ?

[She patiently weaves together many strands until the web is completed.]

Now I want us to see if we can weave together the many things that we have learned these past weeks—to see if we have enough strands in our web to catch our dreams! For just like the spider, with patience and persistence, plus a few new skills, we can achieve our dreams.

To do this we are going to start with this ball of string. To start weaving our web, I want to see if anyone in our group can give me an example of something we have learned together. (**NOTE:** you may have to give clues to the girls to remind them what the session was about.)

- **Why save money** (Give the string to the first person who has an idea and let them pass the string on to someone else if there is another girl with an example—with each of them continuing to hold onto the string after they pass it so a web starts to form.)
- **The difference between needs and wants** (Have the string passed to one or two girls who have an answer, with each of them continuing to hold onto the string after they pass it so the web continues to grow.)
- **Strategies for saving money regularly** (Have the string passed to one or two girls who have an answer, with each of them continuing to hold onto the string after they pass it so the web continues to grow.)
- **Dealing with setbacks in savings** (Have the string passed to one or two girls who have an answer, with each of them continuing to hold onto the string after they pass it so the web continues to grow.)

- **Talking about money with other people** (Have the string passed to one or two girls who have an answer, with each of them continuing to hold onto the string after they pass it so the web continues to grow.)
- **Dealing with conflicts about money** (Have the string passed to one or two girls who have an answer, with each of them continuing to hold onto the string after they pass it so the web continues to grow.)
- **Different ways to earn more money** (Have the string passed to one or two girls who have an answer, with each of them continuing to hold onto the string after they pass it so the web continues to grow.)

Finally, let's complete our web by finding out:

- **Who has made a new friend in this safe spaces group** (have the string passed to one or two girls who have an answer, with each of them continuing to hold onto the string after they pass it so the web continues to grow)
- **Who is a little bit closer to reaching their dream** (have the string passed to one or two girls who have an answer—making sure that by now everyone is holding the string)

Now look how strong our web is. How much we have learned and grown together.

activity 3

LET'S CELEBRATE OUR ACHIEVEMENT

(15 MINUTES)

Say:

We should all be proud of our efforts and we should celebrate our accomplishments together. So let's dance and sing and celebrate.

Invite girls to share dances and songs they know, and then perform them with the group.

HANDOUTS

Use the handouts on the following pages for easy photocopying.

Each handout has a reference under the title that refers to the correct learning session and activity.

Have fun!

ZAHRA'S STORYFROM *session 1), activity 2***ZAHRA'S STORY**

Zahra is 12 years old, and the oldest in her family. She stays with her mother and her three sisters in a two-room “manyatta.” Her mother struggles to buy food and also cloth her girls but she is proud of Zahra since she is so helpful with housework. Zahra even earns some money to help the family by washing clothes for an elderly neighbor and by selling sweets to other pupils at her school.

Luckily, Zahra and her sisters are smart, and Zahra’s mother was helped by the local mosque with scholarships. All four of her children got sponsors who pay school fees for them in a nearby day school—though Zahra has to use some of the money she earns to buy school supplies.

As a young girl Zahra always told her mother that she wanted to be a henna artist, just like the Famous Farhia. Her mother always tells her: “that is not a future job for a person I gave birth to!” So every time Zahra would run to her friend’s place and practice applying henna without her mother’s knowledge. She also used some of the money she earned to buy refreshments for her friends at school—even if it meant not being able to buy all of the school supplies she needed, or saving any money to buy new henna like she wanted to.

When Zahra reached class 6, she dropped out of school. Even when her mother pleaded with her to stay in school and reminded her about her sponsorship she refused. One of her friends from the henna art group said she knew about a way she could make “easy money” and tricked her into leaving home and becoming a wedding henna artist. Zahra’s mum promised not to give up on her daughter so she visited a youth center and talked to the staff who agreed to help her find Zahra and also provide counseling services. Finally she came back home and they trained her to be a professional henna artist. Zahra is now one of the prominent henna artists in her village that is sponsored by the youth center.

SWOT CHART

Things I inside me and around me that may either support or block me from achieving my dream.

FROM *session 1), activity 3*

EIGHT STEPS FOR SAVINGS

FROM *session 2), activity 1*

EIGHT STEPS FOR SAVINGS

1. Choose a Savings Goal
2. Make a Savings Plan
3. Know the Difference Between Needs and Wants
4. Control Spending
5. Think About the Future: Money In and Money Out
6. Save Regularly
7. Save in a Safe Place
8. Deal with Setbacks in Saving

AMINA'S STORYFROM *session 3), activity 3***AMINA'S STORY**

Amina is 12 years old and lives with her mother and younger brother. Her older sister, Halima is married and lives in Garissa town. Halima just had a baby girl, and Amina is eager to visit, to spend time with the baby, and help her sister.

Amina will need money for transport and a small gift for the baby. A cute baby shawl would be perfect! But she can't take money from her home bank for this trip because she is saving that money to buy new school shoes. Amina's dream is save enough money to buy herself shoes so that she can finally stop going to school bare foot. She hopes that her uncle will ask her to fetch water for his cattle so that she can get the money she needs for the trip.

PICTURE CARDS

FROM *session 4), activity 2*

<p>Jewelry</p>	<p>Hijab</p>	<p>Lotion</p>	<p>Mobile phone</p>	<p>Goats</p>	<p>Oil lamp</p>
<p>Pots</p>	<p>Bicycle</p>	<p>Henna</p>	<p>Shoes</p>	<p>School supplies</p>	<p>Sewing machine</p>

SAVINGS PLAN WORKSHEET

FROM *session 4), activity 3*

Sample

Savings Goal	Total (Cost of item)	Amount you can save each week	Number of weeks you need to reach your goal
Short-term New shoes for Id UI Fitr	<i>Ksh. 200</i>	<i>Ksh. 20</i>	<i>10 weeks</i>
Long-term Attending a tailoring course	<i>Ksh. 3,000</i>	<i>Ksh. 60</i>	<i>50 weeks (or almost one year)</i>
Tip: To find out how many weeks it will take to reach your savings goal, divide the total amount of money you need by the amount you can save each week. Amount to save ÷ Amount you can save each week = Number of weeks it will take			

Do-it-yourself

Savings Goal	Total (Cost of item)	Amount you can save each week	Number of weeks you need to reach your goal
Short-term			
Long-term			

THE STORY OF RAFIQAH AND THE STORY OF MUNA

FROM *session 5*, activity 1

THE STORY OF RAFIQAH

Rafiqah is a girl with a dream: she has planned to buy school items like pencils and drawing books because she likes drawing.

Rafiqah keeps her savings in her home bank. Rafiqah's home bank is hidden in a safe place where no one can see it so it cannot be stolen. She puts the 50 Shillings from her grandmother in her home bank. Rafiqah wants to have some money to continue depositing and keep saving up until she has enough for the drawing materials- which cost 100 Shillings. She saves some little money which she is paid by her uncle for fetching water for her uncle's goats over the weekend like 5 shillings or sometimes 10 shillings.

When Rafiqah's brother gets married, she really wants a new dress for the wedding. However, seeing her savings growing in her home bank encourages her not to take money out, so she is able to decide not to buy a new dress. However, she did use some of the money in her home bank one day to buy some sweets. One day, her younger brother comes and demands some money from her, but because the home bank is hidden away and no one knows about it, she does not have to part with any money. Another day, Rafiqah's mother asks for 10 Shillings to buy some sugar, and Rafiqah wanted to help her mom so she went into her home bank and gave her the money. Even though it took a couple of months, Rafiqah was able to save 100 shillings in her home bank and she went and got the school supplies that she needed.

THE STORY OF MUNA

Muna wants to save some money to enroll in a club in her school but she needs some money for registration. She decides to hide her 50 Shillings under her mattress where she sleeps. Like Rafiqah, she also fetches water for her uncle sometimes.

Muna is easily tempted by sweets and biscuits she sees in the market. So, about once a month, she takes a little money from under her mattress. That makes her so happy! And sometimes, when she has fetched water, she puts the money back under her mattress.

One day, her uncle sees her put the money under the mattress, and he demands that she gives him 30 shillings one day to buy food. Her sister's chore is to sweep under the mattresses, so sometimes she takes money from Muna and uses it for her transport. The money also has gotten mixed up with dust and dirt. When the time comes to pay the first installment for the environment club, Muna realizes that she does not have enough money under her mattress.

MUNIRA'S STORY

FROM *session 7*), *activity 2*

THE STORY OF MUNIRA

Munira needed money to help buy food for her family and meet her personal goals, so she started a business of making jewelry from beads and selling it to people in the market. At first business was good, but then more and more young people started to copy Munira (even some of her friends) – and business started to drop.

One thing Munira noticed was that many customers bought matching sandals from another vendor after buying her beads – so she started to sell both jewelry and sandals (giving a special price for people who bought both), and that helped grow her business again.

Next, she started to ask her customers what preferences they had regarding the beads and most of them preferred beads of mixed colors and matching sandals. So Munira started mixing the beads when making the jewelry, and matching them to respective pairs of sandals. This kept most of her customers very loyal to her (and made it easier to sell more too!!)

Finally, Munira paid close attention whenever she travelled to other markets to see if anyone was trying something new when it came to selling beads and sandals. That is where she first found out about a woman selling cheaper raw materials (beads for the jewellery and leather for the sandals). She started buying the raw materials from the woman, hence increasing her profits and at the same time reducing the cost of producing jewellery and sandals. However, she realized that she needed to save and purchase a sack of beads in bulk, as they were always getting more expensive.

SAVINGS PLAN WORKSHEET

FROM *session 9*, activity 2

THE STORY OF ABIDA AND LATIFA

Abida and Latifa work together to assist their elderly uncle to fetch water for the cattle. In return the uncle gives them each Ksh. 20 per week for the good work. The girls are able to earn at least Ksh. 60 per month.

Abida spends all of her money each month buying new clothes whenever she accompanies her mother to the market. Sometimes she helps her friends when they need money, Abida also buys perfume and body lotions whenever she has some money in her pocket, and she never saves any money.

Latifa saves Ksh. 50 each month. It has not been easy, but she has cut down on spending money a lot. Instead of buying perfume and lotion, she decided to continue using the small Vaseline her mother buys her once in a while. She has also decided to wait a few months before buying a new pair of shoes. Even though she still gives some money to her mother for household needs, she has found that it is possible for her to save a little money by differentiating her wants from needs.

NAIMA'S STORYFROM *session 11), activity 1***NAIMA'S STORY**

Naima is a 14-year-old girl who works hard at her studies and helps her family, but she also really enjoys fashion. She has been dreaming of getting a new hijab, but she knows that she can't ask her parents to get one for her. In addition to going to school, Naima usually works one or two days a week helping her aunt to fetch water from the government borehole that is quite a distance from their home. Her auntie gives her at least 20 Shillings a day. Each week, Naima thinks about what she needs to spend the money on to help her family, like food, paraffin for the lamp, and charcoal, as well as some personal needs like Vaseline.

But, sometimes, she will keep a little extra in her home bank just in case she fails to get work in the coming week, or some other need for money comes up—as it usually does! However, every once in a while, Naima finds herself with a small amount of extra pocket money and then she puts it aside to save up and buy a hijab.

TWO COUSINS SAVEFROM *session 12), activity 2***TWO COUSINS SAVE**

Aisha and Baysan are cousins who live next door to each other. They decide that they can make some money making and selling necklaces. In order to buy the the initial materials needed to make the necklaces, the two girls make a promise to start saving. They know exactly what they want to buy and the prices of each item. They decide to save weekly and together agree that when they have 1000 Shillings in total they will be able to start their business.

Baysan is good at math, and the cousins promise to each save 50 Shillings every week. So, they will save a total of 100 Shillings each week. That means that they need to save for 10 weeks before they can start the business. It seems like a long time, but by putting their savings together, it will make it easier for them to realize their goal.

For the first few weeks, both cousins make sacrifices in order to save, and their family congratulates them! But, Aisha becomes tempted and buys a new piece of jewelry. Then, she also uses some of her money to take transportation to the nearby shops instead of walking.

The next week, when Baysan asks Aisha for her savings, Aisha just shrugs and says she can't afford to save right now. She promises to give Baysan a bigger sum of money later, after she has more savings. "Don't worry," she says, "I'll work hard and save a lot next month. It will all work out the same."

THE STORY OF HALIMA

FROM *session 13*, activity 3

THE STORY OF HALIMA

Halima is a 14-year-old girl in class 7 living with her elder sister in Wajir. She would like to save enough money so that she can start a small henna applying business. She will use some of her income for her school items because she can't always depend on her sister to provide them. She knows that she will need to earn some money so that she can buy the initial items she needs.

Halima washes her neighbor's clothes and fetches water to earn at least 20 Shillings per week. She manages to save 200 Shillings in six weeks. Just before Halima sets off to buy henna for her business, her sister falls ill and she has to use the 200 Shillings for medicine.

But Halima does not give up. She begins saving for her capital again and manages again, even though this time it takes even longer (nine weeks). She finally manages and buys a small container of henna that she can use on customers during her cousins wedding. She makes good money and is able to buy more henna and keep her business going. However, a few of her friends also decide to start a henna applying business, so she starts getting fewer and fewer customers.

To keep her business alive so she can keep saving, Halima decides to re-invest some of the money she made applying henna at the wedding into selling small bead bracelets that women buy after they've had henna applied, and is able to make enough money not only to help her buy school items, but also buy more henna and bracelets to keep the business going.

A CONVERSATION BETWEEN A MOTHER AND DAUGHTER

FROM *session 11), activity 2*

A CONVERSATION BETWEEN A MOTHER AND A DAUGHTER

Daughter: Hello, mother. Can I talk to you about something important? Do you have a few minutes now?

Mother: I have to go out soon to work at the stand in the market. Let's make it quick!

Daughter: Mother, I'm thinking it's time I went back to school. Most of the girls in our safe spaces group meetings have gone back to school after we relocated to this village.

Mother: *(cutting her off)* We have had that conversation before. How much more explaining do I have to do to make you understand that this family is not making enough money for all of you to be in school. It's already hard trying to keep your brothers in school. It just has to wait until there is enough money. Besides you being older, you must be doing something and contribute toward helping the family get around these problems. You know that school costs way more than that.

Daughter: But mother, we have been putting my school on hold for two years now. I'm not getting any younger. All my friends are almost completing school now. Does this mean I'm never going back to school?

Mother: Young lady, you do not seem to realize that there are many things that I need to buy for our household. I have to decide how to spend this money in everyone's best interest.

Daughter: I'm sorry. I didn't mean to make you angry. I know it is difficult to manage so many demands on our budget. I can wait to get back into school. Do you think it would be possible for me to come up with a plan to help you pay for my school fees? I'm saving money now, and I am earning some money helping Mama Musa. It isn't much, but if I save, I can make enough to pay half of my schools fees. If I am able to save that money, would you consider helping me pay for the rest?

Mother: That's a good idea. I suppose I could consider that. But just remember that we may need to cut down on many other expenses that are not priority right now.

CONFLICTS ABOUT MONEY: ROLE PLAYSFROM *session 18), activity 1*

1. Ebla helps her grandmother on Saturday morning to feed the cattle and she gets a few small coins in return. She wants to save this money herself. But her mother insists that Ebla give her all of the money to help with household expenses.

2. Fatima gets money each week from her auntie when she fetches for her water early in the morning before school, and saves in her home bank. When her parents learned that Fatima had a little to save at the end of each week, they requested her to be buying some household items.

3. Shamim recently worked for a neighbor for five days. However, when she went to collect her earnings, the neighbor said she had only worked for four days. Shamim wants to resolve the situation and still collect her earnings.
