Historically, Uttar Pradesh (UP) and Bihar are the two highest out-migration states with a net migration rate of -1.9 to -1.

Data from our telephone survey suggests that 28% (n=1237+) of the households in the two states have a migrant worker living/working outside; with 37% among rural households and 18% among urban households.

Migration from these two states is mostly to metros in the states of Maharashtra, Delhi, Haryana, Punjab, Madhya Pradesh and Gujarat.

So far, migrant households in UP and Bihar are largely adhering to social distancing guidelines

However, some migrant households are facing challenges

We need to act now, unitedly, to win the war against Covid-19

Support workers in receiving communities

73% migrant households report they’ve lost their job or main income source. Identify ways to help them return to work

Intensify social security/net programs in Bihar and UP

Household needs:
- Ration: 89%
- Cash: 46%
- Medicines: 24%
- Cooking gas: 8%

Monitor migration within India so that it can be done safely.

Survey shows that migrant workers stranded in other parts of the country; their needs must be addressed

Promote adherence to social distancing behaviors

With low numbers of infections and strong contact tracing efforts, we can win the war against Covid-19.
